Cantilever Sliding Gate

Pedestrian Gate

Standard Lock

Jacksons EuroGuard, featuring our unique, extra strong, vandal proof panel to post fittings is one of the most versatile and adaptable ranges of fencing and gates available.

The range was developed by Jacksons to be easy to specify across a wide variety of applications from decorative demarcation to games areas, retail, industry and high security.

The five styles offered provide the flexibility to precisely match the right EuroGuard fence or gate to meet specific requirements. Simple to install, EuroGuard is the perfect solution for projects requiring fast installation times with a strong, economical and secure perimeter and access solution.

EuroGuard Gates

Swing and sliding gates are made using Flatform Heavy mesh to complement all EuroGuard fencing styles and feature a fully welded frame design.

Available as single and double swing gates with manual operation or automated with underground, swing arm or safety-glide in-stile operators. Single and double sliding gates available in cantilever, tracked and telescopic designs as manually operated or with fully automated operation.

SERVICE LIFE 25 YEARS GUARANTEE

EuroGuard Gates

EuroGuard Single and Double Swing Gates

- Welded frame design
- Available in a range of standard widths up to 10m and heights to 3m for pedestrian and vehicular access
- **Single gates** are supplied as right hand hanging, opening inwards (unless specified) and are complete with key lock, handles and gate stop
- **Double gates** are supplied complete with key in lock, handles, centre gate stop and drop bolts
- 180° opening, adjustable, tamper-proof hinges
- Additional welded vertical support rails subject to leaf width
- 60mm 40mm framing rails
- Square section posts at 100mm, 120mm, 150mm and 250mm subject to size of gate
- Gate posts supplied to allow 800mm - 1.0m in ground or with base plates for bolting onto concrete
- Can be extended in height to carry barbed wire, Rota-Spike or other high security extras
- Suitable for automated operation

EuroGuard Cantilever Sliding Gates

EuroGuard and EuroGuard Combi Cantilever Sliding Gates are ideal for applications where space may be restricted, the ground unlevel, or where a substantial single gate would provide higher levels of security.

The gates are smooth and virtually silent in operation, supported on a special carriage so that a single leaf is able to span widths of up to 15m over track, road, rail or even water.

Gate panels are constructed to the same exacting standards as EuroGuard fencing and are mounted on a substantial bottom rail of formed steel with square section steel support posts.

- Ideal for applications where space is limited or ground obstacles need to be spanned
- Effective operation in applications subject to high wind loading
- Available in a range of standard widths to span up to 30m and in heights to 3m
- Gates to span greater widths available to special order
- Substantial construction ensures safe, reliable operation
- Supplied complete with key in lock and handles
- Heavy duty carriage for smooth, quiet operation
- 2 rail plus substantial tubular steel bottom rail design
- 60mm x 40mm rails
- 120mm x 80mm portals
- Portals supplied with base plates for bolting onto concrete
- Posts can be extended to accommodate gate top mounted physical security devices
- Automated operation ready

Finishes

- Gavanized to BS EN 1461 as standard
- Galvanized and powder coated to BS EN 13438 in one of out standard colours at extra cost
- Powder coated to any other BS and RAL colour to special order

Tracked Sliding Gates

We are able to supply any EuroGuard and EuroGuard Combi gates for tracked sliding operating on level ground if required for exceptionally heavy designs or where a single gate leaf exceeds 12m.

EuroGuard Gates
