Hi Chris,

I did have a look at the plans for this one when I was determining the application. This dormer window was considered to be acceptable as it had does not extend out from the main ridge and features a barn hip corner which softens the flat roof design. The dormers proposed for No. 45 were two, larger, flat roof dormers which extended out from the ridge and on balance, were considered to unacceptable.

I trust this is of use however, please feel free to contact me with any queries.

Regards

Rachael
