Subject: re 12 The Pallant, Planning application for change of use
Attachments: 1021-02-B-proposed.pdf

Dear Mr Eaves
can i formally withdraw application APP/10/00534 as requested all to be superceded by the new APP/10/00866.
Also please find attached drawing 1021-02 rev B amended in response to Conservation Officers Comments

My client and I welcom the comments from your conservation officer and his concerns with the roof pitch.

In response to the Items you have listed.
1. Drawings have been amended to incorperate the mullions indicated in your email.

2. All new windows will be Timber to suit conservation area.

3. The roof covering could well be a problem at such a low pitch. To steepen the pitch would be a problem requiring a flat portion
towards the from. The suggestion of using sheet zinc would be a possibility, i would assume this to be a standing seam system.
For the Moment Could we have this as a conditional approval. For the outbuilding we would prefer to keep the slate.

Many thanks

Regards
Bernard Sales
