

Technical Note

Site: Woodcroft Phase 3, Lovedean

Ref: GE22961-TN01-GR-250320

Client: Grainger plc

Date: March 20, 2025

This technical note has been prepared following attempts to consult with Michelmersh Brickworks as required by the Minerals Team at Hampshire County Council with regards to the Mineral Safeguarding Assessment (ref. GE22961/MSA/JAN25) prepared for this site by Geo-Environmental.

Michelmersh Brickworks has been contacted via email on 17/02/2025 and chased on 07/03/2025, but no response has been received.

In addition to emails, attempts have been made to call by telephone, last attempt and message left on 10/03/2025. Again, no response has been received.

Given the lack of response to emails and telephone calls, it would appear that there is no interest from Michelmersh Brickworks with regards to responding to the minerals consultation to determine if they have any interest in this site as a potential source for brick clay.

For and on Behalf of Geo-Environmental
