RECEIVED

Dear PLANNING OFFICER / MR L OLIVER

I Wish to appeal Against the proposed planning to erect New Internal Lighting and external Flag Poles as part of the "Cambridge Garage" refurbishing

My reasons for objections would be Noise from chandlery and Flapping Materials from the Flags and also Illumination considered to be in Excess of Necessity from LED Lighting:

As a resident opposite this garage My husband and I already have disturbance from Car alarms & Showroom alarms Constantly going off also the premises already have Considerable Nightime Illuminations supposedly for Security

reasons and we already experience clanking and Jangling noises from promotional flags and banners constant throughout the night which disturbs sleep, also I must say that my grandchildren residing in the extended building also experience sleep disturbance both from noise and nightime illumination as their bedroom windows are front facing

As residents who respect the Village atmosphere of Bedhampton its hard to imagine why the Borough Council think these fairground type additions should be considered. In my view these suggestions would be more suited to an Industrial Estate Location such as Solent Road ect, I do not see that these suggestions would bring in more trade due to the Village Location therefor object strongly

PTO

Please officially log and acknowlege this appeal for the reasons stated

Yours Sincerely
