

Proposal.

The tree in question is a London Plane tree, situated on the council verge adjacent to 3 Springs Gardens.

The tree has clearly out grown its site. The roots are disturbing the highway, and the boundary walls of this property. Branches intrude into the property by 4m or so, and overhang Spring Gardens road.

The tree really should be pollarded, or otherwise contained, by the council / county as part of a maintenance programme. However when contacted, Hampshire Council have indicated they have no intention to do so. [Email attached in documentation]

The overhang is a nuisance, due to lack of light to the 3 properties adjacent to the tree, sap/honey dew, and leaf fall.

However the main reason for application is the fear of the branches damaging property by touching roof, or if branches were to fall in storm etc.

Works to be carried out by arborist. Being sympathetic to the shape and health of tree.

The tree is owned by the council / county, on council land. We are not planning to touch the tree beyond the property boundary.

a) Location of tree. View from above. The area in Red denotes the extent of tree entering property, to be removed.

b) View from front . The area in Red denotes the extent of tree entering property, to be removed.

c) View from back. The area in Red denotes the extent of tree entering property, to be removed.
