2.1 Phase Overview 5

2.1 Phase Breakdown 7

1 Introduction

This Phasing Plan forms part of a planning application for a revised pipeline scheme between the Havant Thicket Reservoir and Bedhampton springs and pumping station. Following outline approval of a pipeline scheme in October 2021 (Havant Borough Council ref. APP/20/00991), a new pipeline route and design have been identified, which needs a new planning approval. There has also been a change in approach to deliver additional resilience to the water network, with an additional pipe now being proposed. The new water pipes would be installed inside two adjacent tunnels which would be constructed concurrently to ensure maximum efficiency is achieved, with construction programme durations, and subsequent disruption to local residents minimised.

This Phasing Plan will remain a live document, being revised and updated as required. Each of these updated plans will be submitted to Havant Borough Council for approval prior to the implementation of any changes.

2. Phasing of Works

2.1 Phase Overview

Figures 1 and 2 below provide an overview of the phases of the scheme.

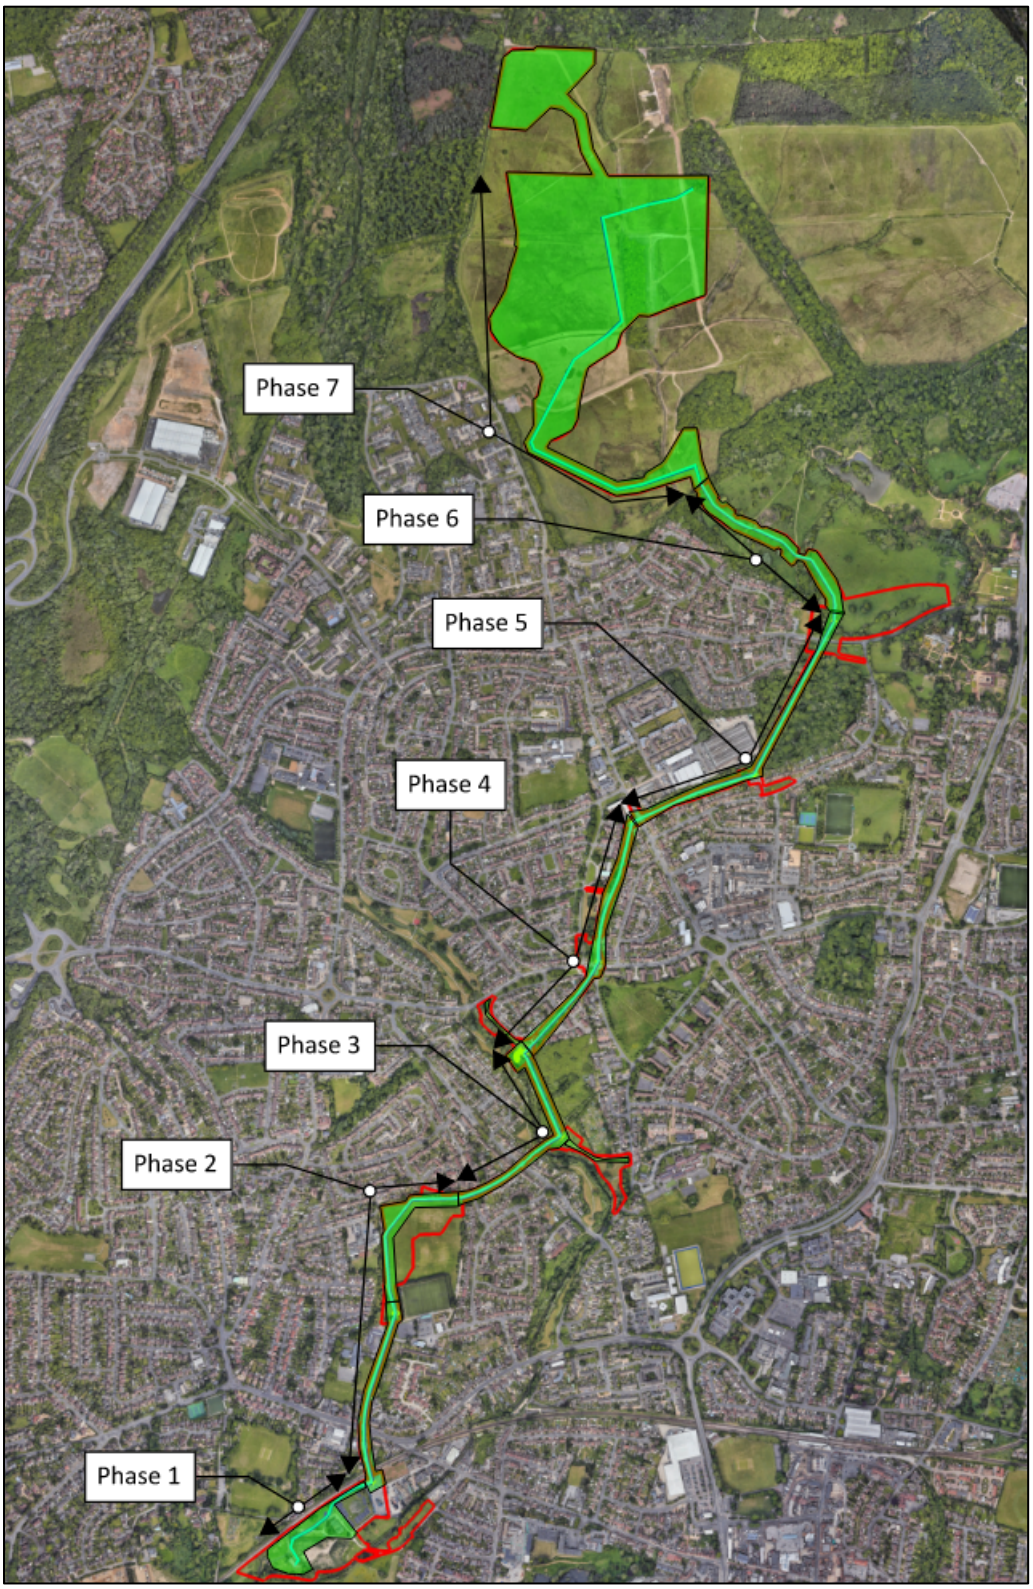

Figure 1 – Phase Overview (Phases 1 – 7)

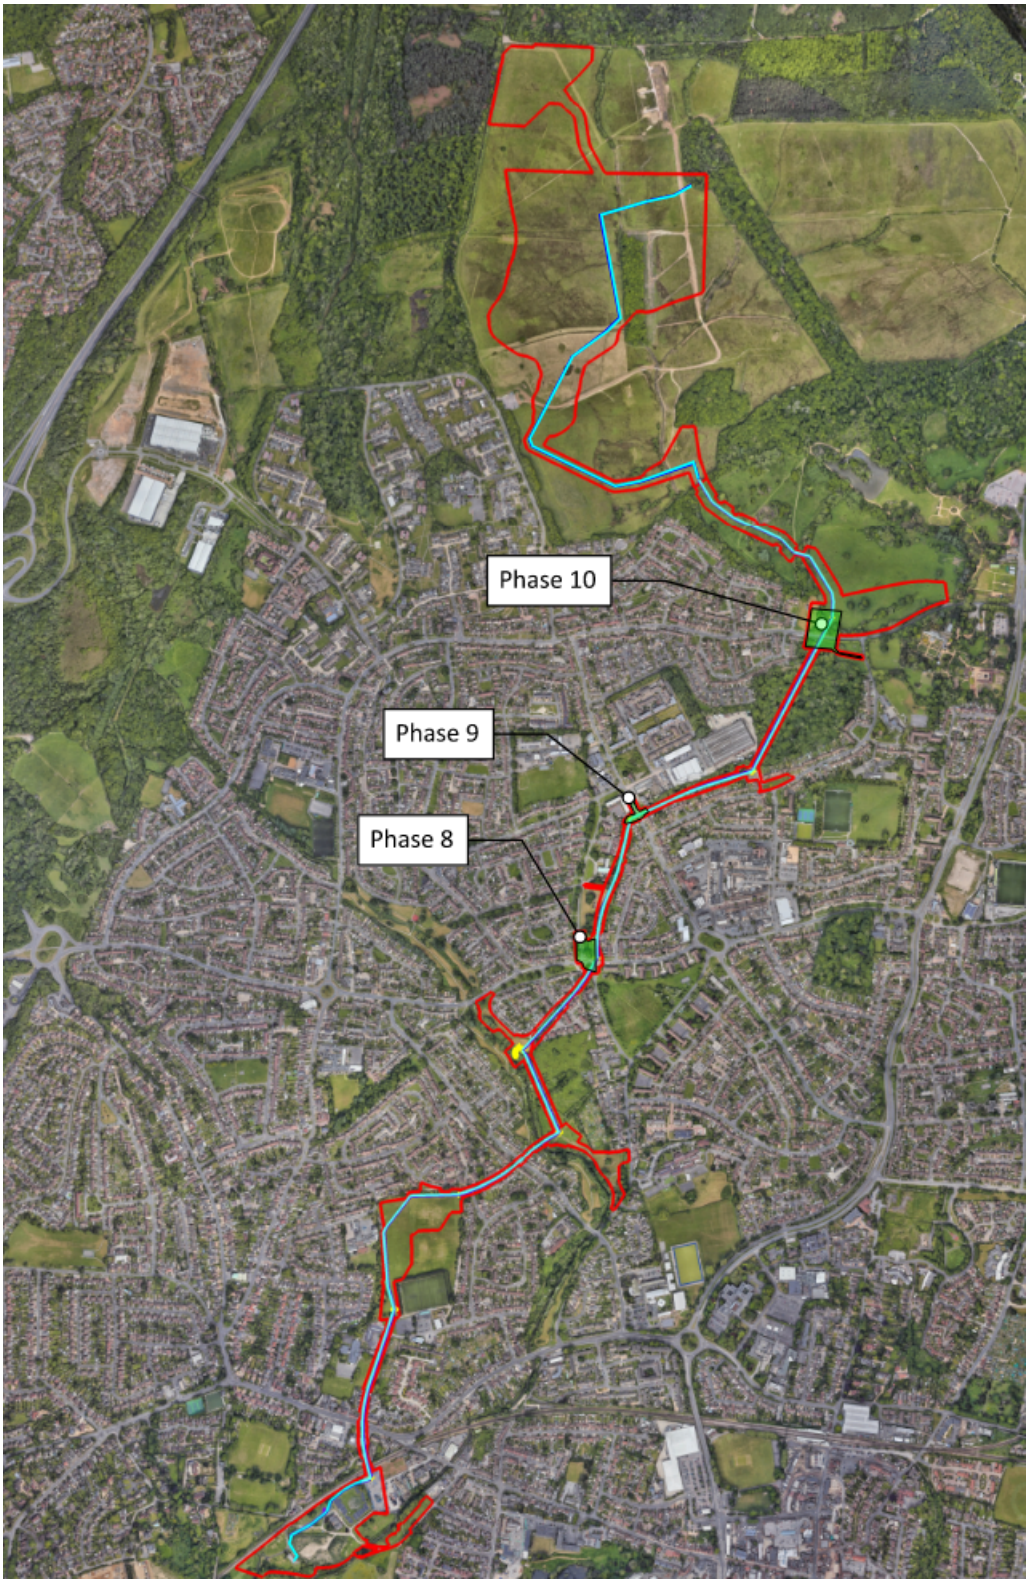

Figure 2 – Phasing Overview (Phases 8 – 10)

2.1 Phase Breakdown

Figures 3 – 12 below provide an overview of each phase of the scheme.

Table 1 provide details in terms of the elements covered under each phase and the proposed timing.

The dates for undertaking the works for the individual phases of the development are provided based on the development programme at the date of submission. The dates are given as periods of two quarters (e.g. Q1 – Q2 of 2026) and the target date would fall into this period.

Should the timing differ significantly then a variation to the Phasing Plan would be submitted for re-approval, however as an example, a submission one quarter earlier or later would not trigger the need for the phasing plan to be re-submitted.
