

Email from planning agent 25/09/2024 re. condition 9:

In response to your condition 14 query and as you will see from the Google Streetview image below and the attached topographical survey drawing , the site covered by the 6 dwellings does not have any trees located on or closely adjacent to the site. In addition, the boundary chain link fence (also visible on the image) is still erected and not only secures the site but also protects the surrounding area from construction activity. This chain link fence will be retained until the site is complete. We trust therefore given the lack of trees on the site the condition can be discharged/disregarded.
