Revision: 01

RE: FIFTH OPERATIONAL TRAFFIC MONITORING REPORT

Introduction

- 1.1 This is the fifth traffic monitoring report for the 2nd quarter of 2024 which is April to June.

Background

- 1.2 The planning consent for the distribution centre, APP/21/01244, including two conditions which require traffic monitoring to be undertaken:

Condition 9

The site shall operate in accordance with the agreed routing strategy detailed within the approved Operational Management Plan. This includes the following measures:

- A defined geography of households to be served by vehicles heading south down New Lane*
- Explicit routing signage on all exits from the site*
- Induction Packs/leaflets and training for all drivers*
- Monitoring of movements via CCTV with regular reporting via an independent third party to the Local Planning Authority in accordance with the parameters of the OMP.*

Reason

To allow for monitoring of the site operation in order to ensure that routes to and from the site utilise main routes in the interests of residential amenity and to avoid congestion having due regard to policies CS16, CS20 and DM10 together with the National Planning Policy Framework.

Condition 10

Prior to the occupation of the development hereby permitted the infrastructure to monitor traffic levels across the 3 site accesses as specified in the Operational Management Plan shall be installed. The occupier will comply with the monitoring and reporting measures

specified in the Operational Management Plan, including the use of independent data monitoring company. Data will be used for monitoring the effectiveness of the Management Plans only.

Reason

To confirm that the traffic levels presented in the Operational Management Plan at planning are reflective of the on-site operation in the interests of amenity and the efficient operation of the Highway Network having due regard to policies CS20 and DM12 together with the National Planning Policy Framework.

1.3 The following are extracts from the approved Operational Management Plan (OMP) which set out how the monitoring will be undertaken:

- 5.7 During the 18 months of operation a quarterly monitoring report will be provided to include data for that quarter. There will be data collected at the same time as when the monitoring of traffic using New Lane to the south of the site is undertaken to ensure co-ordination.*
- 5.10 In each quarterly report the average traffic levels for the quarter will be reported together with the actual data for the identified weeks. The identified weeks will include average daily movements, alongside analysis of the peak period. This data will also include a classification of vehicle types between cars, vans and HGVs. It will be presented for each of the three accesses as well as cumulatively for the whole site.*
- 5.11 Within the monitoring report, the level of traffic to/from the site will be compared to that used in the assessment undertaken in support of the extant planning consent (the data contained in Appendix A). In the event that peak period traffic levels to/from the site are higher to those predicted then an assessment will be made to identify whether the changes would lead to any material impact on the operation of the highway network around the site. If necessary, changes will be identified to how the site is operating to ensure that it is in line with the requirements of the OMP.*
- 5.13 The routing of vehicles to/from the site will be monitored through the installation and maintenance of CCTV cameras within the site to cover the site accesses and one showing New Lane to the south of the site.*
- 5.15 The monitoring of the number of vehicles into and out of the site will be undertaken by the independent survey company reviewing the CCTV footage to match vehicles entering and leaving the site with those using New Lane to the south of the site using ANPR technology which is in line with DfT guidance.*
- 5.16 As set out above, it is proposed that in the first 18 months of operation that the monitoring of vehicle routing is undertaken for 4 weeks every quarter. The weeks that monitoring is undertaken would be at the request of HBC i.e. HBC can choose which weeks the information is provided for. In the event HBC do not require data for any specific weeks then it will be agreed which weeks the data is presented for.*
- 5.19 The data presented in the monitoring report will be in the form of how many vans are recorded travelling to/from the site via New Lane to the south of the site in a day and will be on an hourly basis. This will then be compared to the overall van traffic travelling to/from the site taken from the ATC equipment.*

5.20 *A form of the monitoring reports will be agreed between the independent traffic survey company, the occupier and the LPA in advance of the first report being prepared. This needs to take into account the constraints of confidentiality of data under GDPR and the format of survey results being consistent with DfT approved formats.*

Traffic Data

- 1.4 The traffic data used in this assessment has been provided by an independent traffic data survey company, ATR, using their equipment that has been installed at the three accesses on the site.
- 1.5 As requested by HBC previously a summary will be provided of the raw survey data provided by ATR. This will be a single page summary of the data for the period for the whole site and for each access divided into cars, vans and HGVs. This will be in addition to the raw survey data.
- 1.6 As has been reported to Havant Borough Council there have been some issues with the monitoring equipment at the site. This has resulted in the ANPR camera monitoring New Lane to the south of the site and the associated modem have been replaced. There have also been issues with the SIM card and the level of coverage provided in the area. This have resulted in a failure in communications when the SIM card has been disconnected from the provider's network.
- 1.7 These issues have not affected the monitoring of the traffic to/from the site through any of the accesses, but it has affected the ANPR cameras which monitor vans on New Lane to the south of the site. This means that the ANPR data is only available for the period for 12 days from 19th to 30th June. All of the available data has been presented in the report.
- 1.8 In recognition of the monitoring equipment failures affecting this monitoring period. It is proposed to extend the period of monitoring. This is the fifth monitoring report and would have been the penultimate report of the monitoring the first 18 months of operation of the site. It is proposed to undertake 2 additional monitoring reports to add a further 6 months to the monitoring. This will mean that the first 2 years of the operation of the site will be monitored.
- 1.9 In line with the OMP and the conditions the average information for the whole quarter is presented with more details provided for the weeks requested.
- 1.10 **Table 1** is an extract from Appendix A of the OMP which contains the predicted traffic data for the AM and PM peak periods and for the whole day. This is the benchmark against which the monitoring data is assessed.

Table 1: OMP Traffic Flows

PEAK HOUR	TOTAL
AM Peak (0800-0900)	339
PM Peak (1700-1800)	329
Daily	2,417

Overall Traffic Levels

- 1.11 **Appendix A** is a summary of the surveyed data as requested by HBC and **Appendix B** contains traffic to/from the site across the three site entrances for the 3 month monitoring period. **Table 2** is a summary of this data showing the average traffic in the peak periods and across the whole day.

Table 2: Recorded Average Traffic Flows for the Monitoring Period

PEAK HOUR	TOTAL
AM Peak (0800-0900)	47
PM Peak (1700-1800)	26
Daily	1,111

- 1.12 **Table 3** below is a comparison of the levels of traffic as set out in the OMP.

Table 3: Recorded Traffic Compared to OMP values

PEAK HOUR	TOTAL
AM Peak (0800-0900)	-298
PM Peak (1700-1800)	-303
Daily	-1,306

Traffic Heading South

- 1.13 **Appendix C** contains the traffic data for the requested periods. The traffic data is presented for the site overall and for each of the 3 site accesses.

- 1.14 The proposed of the monitoring of traffic leaving the site and heading south was to monitor the number of vans using New Lane south of the site.
- 1.15 As set out above, data is only available for the period 19th to 30th October and all of this data has been assessed:
- 1.16 While the reason for the condition was to ensure that vans leaving the site do not use New Lane to the south of the site this analysis has been undertaken for all vehicles entering and leaving the site.
- 1.17 **Appendix C** of this report is a summary of the amount of traffic which both arrives and leaves the site and use New Lane to the south of the site. **Table 4** below summarises this data:

Table 4: Recorded Traffic on New Lane South of the Site

PERIOD	AVERAGE DAILY VANS OUTBOUND	AVERAGE DAILY VANS INBOUND	AVERAGE DAILY VANS
19 th to 23 rd June	1	9	10
w/c 30 th June	2	10	12

- 1.18 It should be noted that only vehicle defined as panel and Luton vans or vans derived from cars are included in this analysis.
- 1.19 The level of vans on New Lane to the south of the site remains low.
- 1.20 The outbound movements should be deliveries to the area to the south of the site. To ensure that this is the case and that no other vans are using this route to deliver to other areas the routing of vans have been re-confirmed. The level of vans leaving the site and travelling in this direction has reduced.
- 1.21 The level of vans returning to the site (inbound) using New Lane to the south of the site has reduced from previous periods. It remains the case that there is no reason for drivers to return to the site using this road and drivers will continue to be reminded of this in terms of their routing to ensure that it continues to reduce towards zero. Drivers has been reminded again that they should not return to the site using this route.

Appendix A Traffic Summary

Overall Summary - Average Two Way Movements

	Entrance 1	Entrance 2	Entrance 3	Overall
