RESULT SUMMARY

By following the Government's national calculation methodology for assessing water efficiency in new dwellings this 3 bed dwelling, as designed, achieves a water consumption of 109.7 litres per person per day.

Compliance with Building Regulation 36(1) has been demonstrated.

Additional Notes:

The following are assumed:

1. Washing machine and dish washer are given default values.
2. No water softener is provided.
3. No waste disposal unit is provided.

Actions required:

1. The flow rates for taps and showers herein should be measured at a dynamic pressure of 3 bar. In the case of gravity-fed water systems supplying taps and showers, the flow rates for those fittings should be measured at a dynamic pressure of 0.1 ± 0.02 bar (Note: evidence of this type of system must be provided for the "As Built" report).
