Dear Sir or Madam,

Southern Water Services Limited – planning application for the discharge of Condition 4 (reinstatement methodology) of planning permission APP/23/00004 for the drilling of 2no. test boreholes at the Bedhampton Mariners Cricket Club, Bidbury Lane, Havant, PO9 3JJ.

We write to you in respect of the discharge of condition 4 planning application associated with APP/23/00004 submission for the proposed drilling of 2 no. test boreholes at the Bedhampton Mariners Cricket Club grounds.

Condition 4 requires the submission of a scheme for the removal of the works/compound and the reinstatement of the playing field land to be approved in writing by Havant Borough Council after consultation with Sport England.

The enclosed Restoration Methodology has been through an informal pre-application consultation with Sport England who have agreed to a discharge of Condition 4, on the basis that a Restoration Methodology be submitted in January 2025 to cover the full restoration of the BH101 and 102 sites following the decommissioning of the boreholes.

We can confirm that the overseeding work detailed in the enclosed Restoration Methodology has been carried out, given the time sensitivities, to ensure that the first available planting season following the construction works is met. For the avoidance of doubt, the overseeding covered the

full length of the Trakmat routes to each borehole and the areas of the two construction compounds up to, but not including the monitoring compounds.

We trust that this letter is fully explanatory, however, please do not hesitate to contact Lawrence.Blyth@southernwater.co.uk, if you have any queries or would like to discuss any issues raised in this letter.

Yours sincerely,

Southern Water
