Dear Arleta,

Thank you for consulting me on this application.

I note that planning permission was granted in 2020 for a change of use to allow third party operators to inject bio-methane into the existing gas network.

I am of the view that the current application, which is for a Hazardous Substances Consent to allow for increase quantity of these substances to be stored on site, would not have any additional heritage impact that what was previously considered at planning application stage.

I trust this is of use however if you have any queries, please do not hesitate to contact me.

Kind regards

Rachael
