Phase I Environmental
Assessment Report

Report	In15371 CL 003c
Date	June 2024
Page	2

1 Introduction

1.1 The Purpose of This Assessment

We were commissioned by Hargreaves Properties Ltd (Hargreaves) to undertake a Phase One Environmental Report (also known as a Preliminary Risk Assessment) for the Waterloo Park site, located off Elettra Avenue Waterlooville. The site comprises part of the former BAE Systems Technology Park site and comprises an area of cleared development land, with former buildings demolished and cleared.

Development of two initial plots (Phase One) at the site was completed during 2016/7. We understand that Hargreaves Properties Ltd now proposes to redevelop the remaining site areas for future mixed retail and/or light industrial use.

The purpose of this assessment was to develop an initial conceptual site model of the site and establish whether or not there are potentially unacceptable risks to sensitive receptors from potential contaminants that may be present in the soil and/or groundwater under the site. We have not carried out any intrusive investigation of the site and have made no measurements of actual contamination levels that may be present.

Our environmental assessment was undertaken in accordance with the guidelines presented in the Environment Agency (2020) 'Land contamination risk management (LCRM)' documents and Environment Agency (2010) Guiding principles for land contamination (GPLC).

Your attention is drawn to the Notice to Interested Parties included as Attachment One.

1.2 The Scope of This Assessment

Our assessment included:

- A review of geological, hydrogeological and hydrological information to establish environmental sensitivities at the site and in its vicinity;
- A review of environmental data from previous environmental works;
- A review of environmental information provided by the relevant council (EIR data request);
- A review of available historical information to determine the historical use of the site and its immediate surroundings;
- Preparation of a report, outlining findings and recommendations, including requirements for any further work.

The findings and opinions in this review are based upon information obtained from the sources outlined above. Information obtained from third parties has been accepted at face value; we believe this information to be reliable but do not guarantee its authenticity. Where practicable the information provided was confirmed from a secondary source such as the review of available municipal records.

We have not completed a walkover inspection of the current development area as part of this review. The site comprises an open area of former car parking area / development land only. We do not consider a walkover inspection would improve our conceptual understanding of the site at this time.

All the activities comprising this assessment were carried out in accordance with the procedures set out in our Quality Manual.

1.3 Previous Reports Relating to the Site

As part of our environmental assessment we have reviewed the reports listed in the following table.

Client: Hargreaves Properties Ltd	Phase I Environmental Assessment Report	Report	In15371 CL 003c
		Date	June 2024
		Page	3

Our Ref.	Report Title	Prepared By	Prepared on Behalf of	Date of Issue	Report Reference
Ref.1	Preliminary Risk Assessment for Land Contamination	BAE Systems Environmental	BAE Systems Properties Ltd	July 2008	B0054-00-R1-1
Ref.2	Ground Investigation for Contaminated Land			December 2012	B0054-00-R2-1
Ref.3	Geo-Environmental Investigation Report - Development Plot A and B	Subadra Consulting Ltd	Hargreaves Properties Ltd	February 2016	In15371 CL 001

Our detailed review of these documents is provided in Table Two below. However, we have used information from these documents, where relevant, in other sections of this report.

Table One: Previous Environmental Reports Relating to the Site

Our Ref.	Summary of Results and Conclusions of Previous Works
Ref.1	This report details the findings of a Phase I environmental assessment of the site. This comprised a desk based review of environmental sensitivity information relating to the site and surrounding area and an environmental site audit to identify any potential sources of contamination or potentially contaminative activity. The report concluded the site to be located in an area of low environmental sensitivity. A number of potential contamination sources were identified, however, and a limited Phase II site investigation was recommended.
Ref.2	This report details the findings of an environmental site investigation completed across the site in order to assess the presence and extent of potential ground contamination. A total of twelve boreholes were constructed using window sampling methods, with three of these completed as groundwater monitoring wells. Soil samples were collected for chemical analysis and two return site visits were completed for soil gas and/or groundwater monitoring. The site investigation proved the underlying geology at the site to comprise a thin layer of Made Ground over clays, interpreted as being Head Deposits. No groundwater strike was noted in the underlying clay, although limited perched water was encountered and water was recorded in all three wells installed during the return visits. No elevated concentrations of metals or hydrocarbon compounds were recorded in soil of groundwater samples analysed as part of the site investigation. The investigation concluded that no significant contamination issues were present at the site and that it would be suitable for ongoing commercial use.
Ref.3	This report details the findings of a geo-environmental site investigation completed across two development plots at the northern corner of the former BAE site (immediate north-east of subject site). A total of five boreholes were constructed to 4m depths and five dynamic probes completed to 10m depths at each plot. Underlying geology was proved to comprise a thin layer of Made Ground (gravel of crushed concrete), overlying Head Deposits (clay with occasional flint gravel) to ~2m depth, overlying London Clay (stiff brown or grey clay). Limited perched water was encountered in three boreholes only in the shallow Made Ground. No olfactory or visual evidence of contamination was noted during the site investigation works at the site.

Continued from the previous page

Our Ref.	Summary of Results and Conclusions of Previous Works
Ref. 3	Soil and perched water samples were taken for subsequent chemical analysis. No significant concentration of any contaminants of concern was encountered in any of the soil or perched water samples obtained. The report concluded that the site areas were suitable for continued commercial use.

Table Two: Review of Previous Environmental Works at the Site

1.4 Proposed Development Plans

Proposed Developments	We understand that Hargreaves proposes to redevelop the site for mixed retail and/or light industrial use. Outline planning permission (APP/18/01072) is due to expire on the 14th October 2024. It is this outline permission that our client is seeking to renew.
Active Planning Applications	We understand that this report is to be submitted in support of the outline permission, as detailed above. Whilst our assessment has not been compiled to directly satisfy any specific planning conditions the information contained in this report may assist in satisfying any such requirements. We note however that further works may be required.

2 Desk Study Information

2.1 Site Description, Location and Setting

Site Description	The site currently comprises empty plots of development land; forming the majority of the former BAE Systems site at Waterlooville. Former buildings and hardstanding have been demolished and removed.		
Grid Reference	467632 109956	Location	The site is located off Hambledon Road (B2150 - forms the eastern boundary) and Elettra Avenue on the western outskirts of Waterlooville.
Elevation	~35m AOD		
Size (approx)	~4ha		

Table Four: Site Location and Setting

2.2 Geology, Hydrogeology and Hydrology

	Geological Unit	Description	Estimated Thickness	Data Source
Drift Geology	Head Deposits	Generally clays with poorly sorted layers of sand and gravel.	~5m	British Geological Survey
Solid Geology	London Clay	Grey, weathered brown at the surface, clay.	>25m	
Previous Investigation Data	Previous site investigation works have demonstrated that the underlying geology comprises a thin layer of Made Ground, overlying sandy clay (Head Deposits) to at ~2m depth and then London Clay to >10m.			Ref. 2/3

Table Six: Regional Geology

	Geological Unit	Environment Agency Aquifer Classification	Data Source
Drift Geology	Head Deposits	Secondary Aquifer (undifferentiated)	Environment Agency
Solid Geology	London Clay	Unproductive Stratum	
Previous Investigation Data	Limited perched water was recorded at ~1.5m depths in wells installed at/near the site previously. Generally, no groundwater strikes were recorded during the borehole construction and no consistent groundwater table was encountered.		Ref. 2/3

Table Seven: Regional Hydrogeology

	Description	Distance	Direction	Data Source
Surface Water Features	Surface water drain/culverted stream	On-site	Issues on southern boundary	Ordnance Survey
	Unnamed stream (tributary of Wallington River)	~50m	South	
	Sheepwash Tributary (stream)	~380m	North West

2.3 Site History

2.3.1 Review of Historical Ordnance Survey Maps

Date	Review of Map – Description of Land Use at Site and in the Immediate Surrounding Area	Potentially Contaminative Land-use	
		On-site	Off-site
1897	The site is shown undeveloped and comprises fields. To the immediate north (<50m) is Brambles Farm, with various barns and outbuildings shown. There is a road shown to the east (~25m) and various land drains marked. The surrounding area comprises farmland.	None identified	None identified
1909	No significant changes to the site or surrounding area.		
1932/1965	The site remains undeveloped farmland and Brambles Farm remains shown to the north. Residential properties are now shown developed along the road to the east of the site.		
1973/1982	The remains undeveloped. There is a stream/drain now shown running through the middle of the site, flowing from north to south.		
1984/1989	The site is shown developed with several large industrial 'works' buildings, car parking areas and a tank shown. The surrounding area has been redeveloped for industrial use and is labelled the 'Bramble Farm Industrial Estate'. Various industrial buildings are shown to the north, south and west of the site.	Site occupied by large 'works' buildings. Potential for contaminants to be stored/used.	Various industrial units to the south, west and north.

Date	Review of Map – Description of Land Use at Site and in the Immediate Surrounding Area	Potentially Contaminative Land-use	
		On-site	Off-site
1993	No significant changes. The layout of buildings present at the site remains the same. The surrounding area remains occupied by industrial/commercial buildings to the north, west and south. Residential properties remain along road to the east of the site, with further industrial estate areas beyond.	Site occupied by large 'works' buildings. Potential for contaminants to be stored/used.	Various industrial units to the south, west and north.

Copies of representative historical maps are included as Attachment Two

Table Ten: Historical Maps Review

2.3.2 Review of Previous Site Uses (Ref. 1)

The previous environmental assessment reports we have reviewed (Ref. 1) was completed by BAE Technologies and contains a review of the site layout and activities undertaken. The site was owned by BAE Systems and used for the integration and testing of torpedo sections. In summary:

There were four buildings (not including the gatehouse and security buildings):

- Main Building - constructed in 1983 and located along the eastern edge of the site. This was a three storey structure, with the top two storeys occupied by offices and the ground floor a mix of offices, workshops and laboratories. The main activities were wiring and electronics and no significant quantities of chemicals were stored.
- E Block - constructed in 1983 and located in the south eastern area of the site. This was the main process building, with large open plan areas and overhead cranes for moving sections of torpedos. There were offices on a mezzanine level. This building also housed boiler rooms and back-up generators. There was a diesel tank to the south of E Block - constructed over a catchment pit. This was removed in ~2005.
- Beam Plot Building - constructed in 1997 on the southern area of the site. This was a smaller process building and included a large water tank for testing torpedo units.
- Restaurant Building - constructed in 1983 in the northern area of the site.

The western area of the site was used for car parking and paved with tarmac hard standing.

Three diesel tanks were identified at the site at the time of the inspection (2008); all providing fuel to back-up generators and/or fire pumps. These were double skinned and bunded, or contained in purpose built storage sheds. There was no bulk chemical storage at the site, with small amounts of chemicals stored in a locked store room.

The report noted that environmental housekeeping standards were generally high and well organised.

2.3.3 Review of Historical Planning Records

The Havant Borough Council planning website holds various records relating to planning applications made at the site from 1992 to current day. A summary of these is provided in the table below:

Client: Hargreaves Properties Ltd	Phase I Environmental Assessment Report	Report	In15371 CL 003c
		Date	June 2024

Date	Application Number	Local Planning Authority – Planning Records (from local planning authority website)	Evidence of Development
1994	94/51340/003	Installation of bunded cleansing facility within existing storage compound	Former BAE Systems use. All buildings now cleared.
1995	95/51340/006	Construction of a facilities building and 8.1m nitrogen tank on land fronting Silverthorne Way	
1998	98/51340/009	Outline application for construction of replacement staff restaurant and social club	
2006	06/67977/003	To dismantle and remove existing 60m chimney stack & replace with new boiler flue system 9.6m high	
2012	APP/12/00652	Outline application for demolition of "main building" and ancillary restaurant and redevelopment	Yes - all former buildings cleared
2013	APP/13/00893	Outline application for mixed-use employment, leisure and retail development	Withdrawn
2015	APP/15/00772	Erection of a foodstore (Class A1) with parking.	Yes - initial development complete
2015	APP/15/00773	Erection of a restaurant/drive thru (Classes A3/A5)	
2018	APP/18/01072	Outline planning application with all matters apart from access reserved for subsequent approval for the erection of Class B1(c) / B2 / B8 development and Class B8 Trade Counter use, Class A1 Retail, Class D2 Leisure and Classes A3 and A5 Drink / Food Establishments	Granted permission/consent/certify lawfulness

Table Eleven: Planning Records

2.3.4 Pollution Incidents

We have not identified any pollution incidents directly associated with the site (data source - Environment Agency).

2.3.5 Information Provided by the Council

EIR Data Request	A summary of the information provided to us is summarised below: ➤ There are no recorded pollution incidents at the site or immediate surrounding area. ➤ One incident of fly-tipping was reported in June 2023 (no further information). ➤ The site has not been subject to any Contaminated Land inspections/investigations/determinations under Part 2A of the Environmental Protection Act 1990. The site has not been assigned as a specific priority. The councils full response is included as Attachment Three.

2.4 Additional Information

Flood Risk Zone	Flood Risk	Data Source
Zone 1	The majority of the site is shown to be within Flood Risk Zone 1. This is defined as an area where flooding from rivers and the sea is very unlikely. There is less than a 0.1 per cent (1 in 1000) chance of flooding occurring each year. The majority of England and Wales falls within this area. A flood risk assessment is not likely to be required as part of future planning applications.	Environment Agency
Zone 2	The far south western corner of the site is shown to be located within a Flood Risk Zone 2. These outlying floodplain areas that are likely to be affected by a major flood, with up to a 0.1 per cent (1 in 1,000) chance of occurring each year. A flood risk assessment will likely be required as part of future planning applications (as site is also >1ha).	

Table Thirteen: Preliminary Flood Risk Assessment

Risk	Description	Data Source
Radon Risk	The site is located in an area where the National Radiological Protection Board have determined that <1% houses exceed the recommended Action Level for radon for existing homes in the UK of 200Bqm ⁻³ (averaged over a year). Current Building Regulations do not require any radon protective measures be included in the construction of new buildings or extensions.	Public Health England
Nearest Landfill	The Environment Agency records show that there are no current or past landfill sites within 250m of the site. The site is therefore unlikely to be at-risk of impact from elevated concentrations of hazardous ground gases that are commonly associated with landfill sites e.g. methane or carbon dioxide. As such we do not consider monitoring or assessment are required as part of any future investigation works and no special precautions are likely required to prevent landfill gas infiltration into the current building or future developments at the site.	Environment Agency
Risk of Coal Mining	The site is not located in an area considered to be at risk from coal mining activity.	Coal Authority
Solution Feature Risk	The potential for dissolution stability hazards at the site location has been assessed by the British Geological Survey as Very Low Risk.	BGS

Table Fourteen: Landfill, Radon Gas and Coal Mining Risk

3 Preliminary Risk Assessment

3.1 Conceptual Site Mode

We have used the information presented in the previous sections of this report to create an outline Conceptual Site Model for the site. We have reviewed potential contaminants and their receptors together with any possible pathways that may link them. The resulting pollutant linkages are summarised on the following page.

Client: Hargreaves Properties Ltd

Contaminant	Pathway	Receptor	Viable Pollutant Linkage
Site was developed during the early 1980s from farmland as a BAE Systems facility. No bulk chemical or fuel storage ever recorded on site. Previous environmental management standards were high. No significant contamination of underlying soils or perched water encountered during two previous phases of site investigation completed. Made Ground is reported to be present at the site and may also constitute a potential source of contamination	Ingestion and dermal contact	Future site workers	No - no contaminant source identified at the site. Previous environmental management standards were high and no significant volumes of chemicals or fuels stored at the site.
	Permeation of contaminants, particularly hydrocarbons, into drinking water supply service pipes		
	Volatilisation of hydrocarbons to indoor/outdoor air (either direct from soils or dissolved in groundwater)		
	Off-site migration of hydrocarbons: volatilisation to indoor/outdoor air (vapours from on-site soils or via lateral migration of dissolved compounds)	Commercial/industrial units to the north, west and south. Residential properties >50m east.	No - no contaminant source identified at the site. Previous environmental management standards were high and no significant volumes of chemicals or fuels stored at the site.
	Downward migration of contaminants to groundwater	Underlying geology comprises Head Deposits overlying London Clay	No - no sensitive aquifer present under the site at shallow depth. No consistent groundwater present.
		Surface water drain runs under the site and issues to the south into a stream.	No - no contaminant source identified at the site. No consistent groundwater/viable pathway present.
		Surface water abstraction 86m SW (source transfer)	
		Site located within Source Protection Zone 1c	No - underlying London Clay will act as a barrier to potential downwards migration of any contaminant present at shallow depth under the site.
		No environmentally sensitive site identified	No

Item		Data
Has our qualitative assessment confirmed that a viable pollutant linkage(s) exist at the site?		No
We therefore consider investigation and/or risk assessment works are not required. See below for our conclusions and any recommendations for further works.		
Table Seventeen: Results of Preliminary Risk Assessment		
4 Conclusions and Recommendations		
The results of our assessment indicate the following:		
➤ The site is located in an area of relatively low environmental sensitivity. Underlying geology comprises a thin layer of Head Deposits (clay or sandy clay), overlying London Clay (clay) which has been proved to >4m depth. There is no consistent shallow groundwater table under the site, with isolated perched water encountered only during two previous phases of site investigation. The immediate surrounding area comprises predominantly commercial/industrial units, with some residential properties to the east. ➤ The site was first developed from farmland during the early 1980s, for use by BAE Systems as a torpedo research and testing facility. There were reported to be high levels of environmental management and housekeeping employed at the site, and no significant volumes of chemicals or fuels were ever stored or used at the site. ➤ Previous investigations have been completed at the site and no significant contamination issues were identified. ➤ Based on our review of the site location, history and previous works completed, we do not consider it likely that any significant contamination is present in underlying shallow soils. On the basis of the information we have reviewed, we consider the site will be suitable for the intended future commercial end use. ➤ In conclusion, we do not consider further environmental site investigation or remediation to be necessary at this time.		
Table Eighteen: Conclusions		
We recommend the following:		
➤ As at any brownfield site, we recommend that good site hygiene practice is followed during the construction work, including use of appropriate PPE, and provision of a clean area with washing facilities for use after each shift. Changing and washing areas should be positioned to ensure that no field equipment enters the clean area. Eating, drinking and smoking should be restricted to the clean area. ➤ In the event that any olfactory or visual evidence of contamination is encountered during the redevelopment works / construction of foundation excavations in the future (i.e. a watching brief), we recommend that we attend the site and complete verification sampling of underlying soils to confirm no significant contamination is present.		
Your attention is drawn to the Notice to Interested Parties included as Attachment One.

NOTICE TO INTERESTED PARTIES**

Client: Hargreaves Properties Ltd

Report	IN15371 CL 003c
Date	July 2024
Page	Attachment One - 1

Elettra Avenue, Waterlooville

NOTICE TO INTERESTED PARTIES

The purpose of our work is to provide general information on the environmental And/OR geotechnical conditions existing at the site And related to soil And/OR groundwater. The Client Or others specified the scope of the investigation And the validity of our conclusions is limited by the scope of work specified. We are Not responsible for any such limitations Or omissions.

Where stated in this report, we have used information supplied by third parties. While we have evaluated As far As possible the validity Of this information, we cannot guarantee its accuracy In any way whatsoever.

No investigation technique is capable Of completely identifying all Of the contaminants that might be present In the soil Or groundwater under a site. Where specified In our report, we have examined the ground by constructing a number Of boreholes And/OR trial pits. We recovered samples Of soil And/OR groundwater from available exposures.

The depth And spacing Of our Sampling locations were selected To ensure With a reasonable probability that they would be representative Of the actual conditions across the whole site. However, safety considerations relating To existing site infrastructure may have restricted our ability To investigate all potential contaminant sources. Specifically, we were unable To investigate the soil And groundwater condition immediately adjacent To the underground structures And/OR buried services. These limitations must be borne In mind When considering the conclusions reached In this report.

Soil is intrinsically variable And the spread Of contaminants within the soil is therefore subject To a degree Of non-uniformity. For these reasons no sampling technique can completely eliminate the possibility Of obtaining samples that are Not representative Of the actual conditions. Our sampling techniques are intended To reduce the possibility To an acceptable level, within the limits imposed by the scope of the investigation.

Groundwater levels And soil vapour levels that we report were accurate at the time of the investigation. Groundwater And soil vapour levels are variable. Long term monitoring may be required to ensure that the levels recorded during our investigation are representative of long term And possible 'worst case' conditions. In accepting our recommendations and/or conclusions the Client acknowledges that further, more detailed investigation would allow a more accurate assessment of site conditions to be made and that this would reduce any consequential risk to the Client.

Our investigation was carried out to assess the significance of contamination resulting from use of the site as identified in this report. Unless we have indicated otherwise, no assessment of the potential impact of any other previous uses has been made. No investigation was carried out to determine whether or not any deleterious or hazardous materials (such as asbestos) have been used in the construction of the buildings present on the site. Unless otherwise stated no investigation or assessment has been made of the presence or otherwise of invasive plant species including but not limited to Japanese Knotweed.

Unless specifically stated otherwise, we have not assessed the effect of any proposed future construction activities on existing structures on or near to the site. Nor, unless stated otherwise, have we assessed the likely effect of trees on existing or proposed structures on or near the site.

We do not accept any responsibility for the cost of remedial works or other costs incurred in whatever way whatsoever as a result of any omissions, errors or other shortcomings in this report unless we have been given reasonable opportunity to verify ourselves that such faults exist and we have been given a reasonable opportunity to carry out works to remedy such faults ourselves using the most practicable means available to us. We do not accept liability for any consequential losses incurred by you while either we or others carry out any remedial works we deem necessary.

This report has been prepared for the Client, as specified on the cover page of this report. In accepting our recommendations and/or conclusions the Client accepts that the terms of our appointment were as detailed in the Proposal, or Proposals, that we provided to the Client before being appointed and that these terms supersede any other terms and/or conditions set out in any contracts agreed between ourselves and the Client, regardless of when such terms and/or conditions were agreed to by us and/or signed by us.

Use of, and reliance on, this report by other third parties will be at such third parties own risk, and we do not accept any liability or responsibility to them.

Neither the whole nor any part of this report, or any reference to it, may be included in any published document circular or statement or published in any way without our prior written approval.

This report and its contents, together with any supporting correspondence or other documentation, remain the property of Subadra Consulting Limited until paid for in full. The copyright to this report remains vested in Subadra Consulting Ltd at all times.

LANDMARK INFORMATION GROUP®

Hampshire & Isle Of Wight

Published 1879 - 1881

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Large-Scale National Grid Data

Published 1993

Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Report	IN15371 CL 003c
Date	July 2024
Page	Attachment Three - 1

Dear Alex Akeroyd

Information request 24-103

Thank you for your request for information under the Environmental Information Regulations 2004 which was received by Havant Borough Council on 17th May 2024. Please see following your questions and our response to each in relation to Elettra Avenue, Waterloo PO7 7XN: -

1) Are there any records to indicate there have been Local authority pollution incidents at the site or immediate surrounding area?

- **No;**
- 2022 (May); Council was made aware of a report of a fish die-off due to a suspected spill of cosmetics waste from a unit on Waterberry Drive (entering the surfacewater sewer system). Under active management of the wastewater undertaker when the Council was made aware. Investigated as potential Contaminated Land matter, dismissed. Deferred to Environment Agency as a waste management / pollution of controlled waters issue.
- This Response does not include complaints of alleged nuisance. The EA should be contacted for details of recorded pollution incidents - the Council is not the data controller for these records.

2) Are there any records to indicate there have been Local Authority fly-tipping incidents at the site or within the immediate surrounding area?

- Whilst the council does not fly-tip, our CRM indicates there was 1 incident reported to us in June 2023 under the above address, however having spoken to one of the long-serving team members is believes there has approx. $\frac{3}{4}$ incidents over the last 7/8 years.

3) Are there any private water supplies on your Local Authority Private Water Supply Register, within a 500m radius of the site?

- **No**

4) Are there any Local Authority regulated prescribed processes within a 500m radius of the site?

- **Yes**
 - Rusdene Services Ltd. (Trading As Total); Petrol Vapour Recovery Stage 1. Permit Ref: HBC/IPPC/08/01348. 167m (from Subject Site Boundary)
 - Sainsbury's Supermarkets Ltd; Petrol Vapour Recovery Stage 2. Permit Ref: PERM14/3000HBC. 178m 167m (from Subject Site Boundary)
 - ASDA Stores Ltd.; Petrol Vapour Recovery Stage 2. Permit Ref: PERM13/01000 (VR6 Issue 1) 468m 167m (from Subject Site Boundary)

5) Has the site been subject to any Contaminated Land inspections/investigations/determinations under Part 2A of the Environmental Protection Act 1990? Does the site sit on the Council's prioritisation lists for future investigation and if so, where do they sit?

- **No.** The site has not been assigned a specific priority rank

6) Are there any records to indicate there have been any past or present landfill sites at the site or within the immediate surrounding area?

- **Yes, indicative records of informal/unlicensed fill only;**
 - Newlands Development (APP/10/00828); 'Earthworks disposal area' 39,000sq.m. Earth Spoils. 330m
 - Assumed infilled drainage pond; 127sq.m. Unknown Fill type/status. 371m.
 - Old Park Farm Phase 1, 3 & 4 Areas (BUND 1) (05/40000/000); 554 sq.m. Earth Spoils. 446m
 - Old Park Farm (Builders Yard); 3rd party identified general made ground (land raising); 17283sq.m. Identified within Planning Ref: 05/40000/000 & APP/11/00886. 462m
 - Old Park Farm Phase 1, 3 & 4 Areas (BUND 4) (05/40000/000); 1465sq.m Earth Spoils. 493m

7) Are there any records to indicate past uses for the site (e.g. GIS information, aerial photos etc).

- **Yes (see question 8)**

- APP/15/00773 B0054-00-R1-1 Appendix 2
- APP/18/01072 In15371 CL 003a Attachment 2
- APP/21/00399 In15371 CL 003a Attachment 2

8) Are there any records to indicate the presence of potential contamination issues at the site or within the immediate surrounding area? (e.g. old environmental reports).

Yes;Planning Archive not exhaustively searched. Manual check of 48 planning files has been undertaken

- APP/15/00772 – Shortcut to Docs submitted under 00773
- APP/15/00773
 - BAE Systems Environmental Preliminary Risk Assessment for Land Contamination. Ref: B0054-00-R1-1. July 2008. Appendix 2 (Envirocheck Report)
 - BAE Systems Environmental ground Investigation for Contaminated Land. Ref: B0054/01-R2-1. Dec 2012
- APP/18/01072
 - Subadra Consulting Ltd. Phase 1 Environmental Desk Study Report (Preliminary Risk Assessment). Ref: In15371 CL 003a. Sept 2018. (Attachment 2 Historical Maps). Document lists prior reports that have not been submitted to- or reviewed by- HBC (ref 3).
- APP/21/00399 – resubmit Subadra Consulting Ltd. Phase 1 Environmental Desk Study Report (Preliminary Risk Assessment). Ref: In15371 CL 003a. Jan 2021.

This concludes our response to your request.
