On Behalf Of: Planning Policy, PPUD

Comments

Planning permission has previously been granted under reference APP/22/01229 for the change of use of the first floor space to be converted from residential to dental surgery. This application extends the proposal to the second floor also.

In policy terms, the considerations remain the same.

The principle of the Class E use on the upper floors is supported in policy terms. This view takes into consideration the town centre location and the fact that a residential unit will be lost.

The change of use is supported by the policies in the Local Plan (Policies CS4 and AL3) and the Emsworth Neighbourhood Plan (Policy C2) which seek to protect the vitality and viability of town centres, including the Emsworth District Centre. Policy CS4 supports development which supports small and independent businesses in the town centre, and policy C2 supports Class E uses here. AL3 is largely concerned with maintaining active ground floor frontages, which this proposal safeguards.

Policy CS9 of the Local Plan is concerned with meeting housing needs over the plan period. It does not contain specific provisions regarding the loss of housing, but the explanatory text contains a heading dealing with loss of dwellings'. Paragraph 6.26 states that only in instances whereby the loss of dwelling(s) will be to achieve wider benefits in accordance with other objectives of (this) Core Strategy should proposals be considered favourably. It is considered that the loss of flats is outweighed here by the fact that a community and health use in a sustainable town centre location is supported by the change of use.
