

Proposed 3D 4

This 3D architectural rendering shows a proposed building extension (labeled 'Proposed 3D 4') in the foreground. The extension is a single-story structure with a gabled roof, featuring two large rectangular skylights and two smaller square skylights. It is enclosed by a wooden fence. In the background, an existing two-story building with a gabled roof and two chimneys is visible. The existing building has multiple windows and a small square extension on its side. A wooden deck or platform is situated between the proposed extension and the existing building. The entire scene is rendered in a clean, line-art style with no shading or textures.
