Afternoon Lesley,

Many thanks for your time on site January 10<sup>th</sup>, we trust it proved a useful and helpful visit to assess and understand the measures taken on site to date.

As requested, please find attached a summary to each of the key points, together with an updated Proposed Site Plan highlighting these. As discussed, the previously proposed separate below-ground drainage measures and bunding are now proposed to be removed.

On the matter of the Slow Worm, RMG have taken advice from a local Ecology Consultant who has recommended the Amphibian and Reptile Conservation Trust. A charitable contribution will be discussed with them directly.

We would be pleased to receive your acknowledgment and confirmation that these can now be readvertised/reconsulted as necessary.

Kind regards

**Steve Smith**
