

I write in connection with the above proposed housing developments in College Road.

My objections are still the same as I stated when the original development was proposed by Persimmon Homes. The only thing that has changed is the installation of traffic lights at the junction of College Road and Purbrook Way.

There are still major concerns regarding the impact on the local roads etc This proposal could mean upto an extra 1500 vehicles . At peak times now the roads are gridlocked.

What has been done concerning the provision of additional health care ie doctors and dentist ?. From what I can see nothing. Also where are the additional school places being provided. I understand in the original proposals the developer would provide funding to enlarge Moorlands School, is this still the case ?.

The extra 730 dwellings { upwards of an extra 2000 people} that this development will provide is going to have a large impact upon all the local services specifically health care

Has anything been resolved concerning the close proximity of the development to the local golf course ,specifically the teeing areas on holes 6 and 7 ?.

As stated previously in my original objections ,I am not against the construction of new homes as they are needed.

To allow this development to proceed there must be assurances that all the above concerns are dealt with, specifically health care

Regards
