

DPO1 Havant

Third Operational Traffic Monitoring Report

193664-214/N03

January 2024

Introduction

1. This is the third traffic monitoring period for the 4th quarter of 2023 which is October to December.

Background

2. The planning consent for the distribution centre, APP/21/01244, including two conditions which require traffic monitoring to be undertaken:

Condition 9

The site shall operate in accordance with the agreed routing strategy detailed within the approved Operational Management Plan. This includes the following measures:

- *A defined geography of households to be served by vehicles heading south down New Lane*
- *Explicit routing signage on all exits from the site*
- *Induction Packs/leaflets and training for all drivers*
- *Monitoring of movements via CCTV with regular reporting via an independent third party to the Local Planning Authority in accordance with the parameters of the OMP.*

Reason

To allow for monitoring of the site operation in order to ensure that routes to and from the site utilise main routes in the interests of residential amenity and to avoid congestion having due regard to policies CS16, CS20 and DM10 together with the National Planning Policy Framework.

Condition 10

Prior to the occupation of the development hereby permitted the infrastructure to monitor traffic levels across the 3 site accesses as specified in the Operational Management Plan shall be installed. The occupier will comply with the monitoring and reporting measures specified in the Operational Management Plan, including the use of independent data monitoring company. Data will be used for monitoring the effectiveness of the Management Plans only.

Reason

To confirm that the traffic levels presented in the Operational Management Plan at planning are reflective of the on-site operation in the interests of amenity and the efficient operation of the Highway Network having due regard to policies CS20 and DM12 together with the National Planning Policy Framework.

3. The following are extracts from the approved Operational Management Plan (OMP) which set out how the monitoring will be undertaken:
 - 5.7 *During the 18 months of operation a quarterly monitoring report will be provided to include data for that quarter. There will be data collected at the same time as when the monitoring of traffic using New Lane to the south of the site is undertaken to ensure co-ordination.*
 - 5.10 *In each quarterly report the average traffic levels for the quarter will be reported together with the actual data for the identified weeks. The identified weeks will include average daily movements, alongside analysis of the peak period. This data will also include a classification of vehicle types between cars, vans and HGVs. It will be presented for each of the three accesses as well as cumulatively for the whole site.*
 - 5.11 *Within the monitoring report, the level of traffic to/from the site will be compared to that used in the assessment undertaken in support of the extant planning consent (the data contained in Appendix A). In the event that peak period traffic levels to/from the site are higher to those predicted then an assessment will be made to identify whether the changes would lead to any material impact on the operation of the highway network around the site. If necessary, changes will be identified to how the site is operating to ensure that it is in line with the requirements of the OMP.*
 - 5.13 *The routing of vehicles to/from the site will be monitored through the installation and maintenance of CCTV cameras within the site to cover the site accesses and one showing New Lane to the south of the site.*
 - 5.15 *The monitoring of the number of vehicles into and out of the site will be undertaken by the independent survey company reviewing the CCTV footage to match vehicles entering and leaving the site with those using New Lane to the south of the site using ANPR technology which is in line with DfT guidance.*
 - 5.16 *As set out above, it is proposed that in the first 18 months of operation that the monitoring of vehicle routing is undertaken for 4 weeks every quarter. The weeks that monitoring is undertaken would be at the request of HBC i.e. HBC can choose which weeks the information is provided for. In the event HBC do not require data for any specific weeks then it will be agreed which weeks the data is presented for.*
 - 5.19 *The data presented in the monitoring report will be in the form of how many vans are recorded travelling to/from the site via New Lane to the south of the site in a day and will be on an hourly basis. This will then be compared to the overall van traffic travelling to/from the site taken from the ATC equipment.*

5.20 *A form of the monitoring reports will be agreed between the independent traffic survey company, the occupier and the LPA in advance of the first report being prepared. This needs to take into account the constraints of confidentiality of data under GDPR and the format of survey results being consistent with DfT approved formats.*

4. The traffic data used in this assessment has been provided by an independent traffic data survey company, ATR, using their equipment that has been installed at the three accesses on the site.
5. In line with para 5.16 of the OMP the Havant Borough Council has asked for data for the following periods:
 - 20th November to 3rd December
 - 11th to 24th December
6. In line with the OMP and the conditions the average information for the whole quarter is presented with more details provided for the weeks requested.
7. **Table 1** is an extract from Appendix A of the OMP which contains the predicted traffic data for the AM and PM peak periods and for the whole day. This is the benchmark against which the monitoring data is assessed.

Table 1: OMP Traffic Flows

Peak Hour	Total
AM Peak (0800-0900)	339
PM Peak (1700-1800)	329
Daily	2,417

Overall Traffic Levels

8. **Appendix A** contains traffic to/from the site across the three site entrances for the 3 month monitoring period. **Table 2** is a summary of this data showing the average traffic in the peak periods and across the whole day.

Table 2: Recorded Average Traffic Flows for the Monitoring Period

Peak Hour	Total
AM Peak (0800-0900)	16
PM Peak (1700-1800)	42
Daily	1,398

9. **Table 3** below is a comparison of the levels of traffic as set out in the OMP.

Table 3: Recorded Traffic Compared to OMP values

Peak Hour	Total
AM Peak (0800-0900)	-323
PM Peak (1700-1800)	-287
Daily	-1,019

10. **Appendix B** contains the traffic data for the requested periods. The traffic data is presented for the site overall and for each of the 3 site accesses.

Traffic Heading South

11. The proposed of the monitoring of traffic leaving the site and heading south was to monitor the number of vans using New Lane south of the site.
12. In line with the request from HBC the following weeks have been assessed:
- w/c 20th November
 - w/c 27th November
 - w/c 11th December
 - w/c 18th December
13. While the reason for the condition was to ensure that vans leaving the site do not use New Lane to the south of the site this analysis has been undertaken for all vehicles entering and leaving the site.
14. **Appendix B** of this report is a summary of the amount of traffic which both arrives and leaves the site and use New Lane to the south of the site. **Table 6** below summarises this data:

Table 6: Recorded Traffic on New Lane South of the Site

W/C	Average Daily Vans Outbound	Average Daily Vans Inbound	Average Daily Vans
20 th November	2	2	4
27 th November	2	15	17
11 th December	4	9	13
18 th December	2	10	12

15. It should be noted that only vehicle defined as panel or Luton vans are included in this analysis. It is assumed that all vans travelling before noon are leaving the site (outbound) and those after this time are returning (inbound).

16. The level of vans on New Lane to the south of the site is low.
17. The outbound movements will be to deliveries to the area to the south of the site.
18. There is no reason for vans returning to the site (inbound) to use New Lane to the south of the site and drivers will be reminded of this in terms of their routing.
