

7.

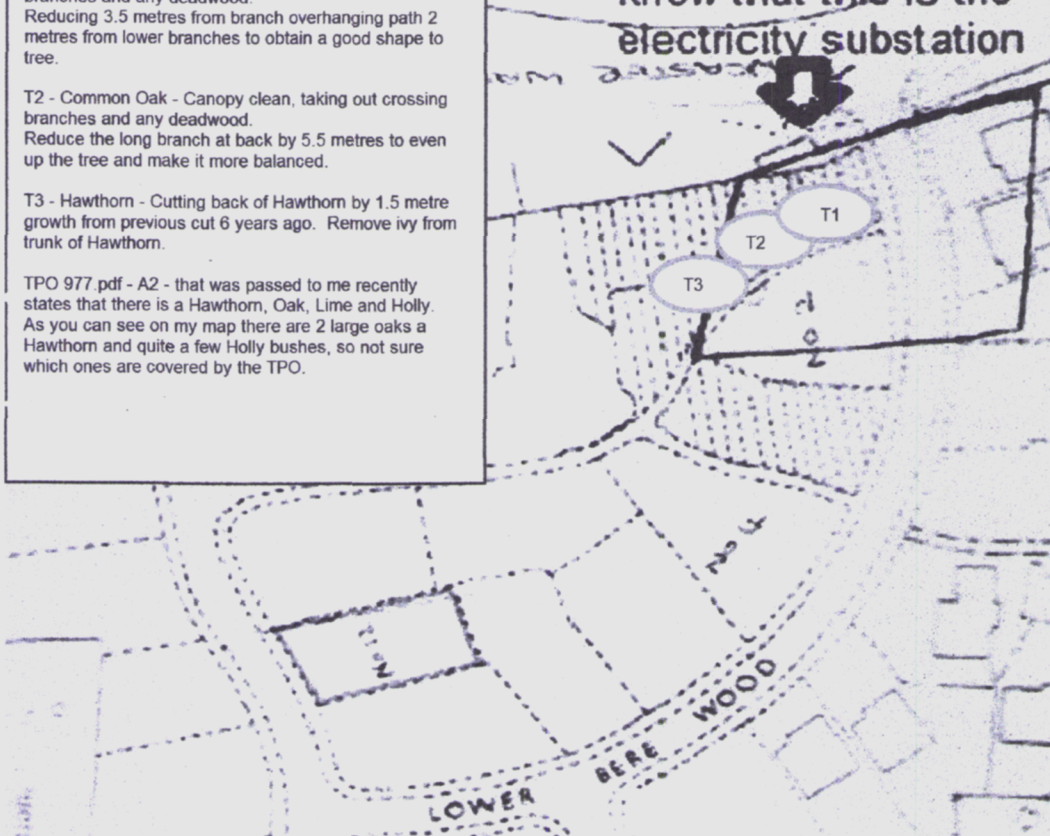

T1 - Common Oak - Canopy clean, taking out crossing branches and any deadwood.
Reducing 3.5 metres from branch overhanging path 2 metres from lower branches to obtain a good shape to tree.

T2 - Common Oak - Canopy clean, taking out crossing branches and any deadwood.
Reduce the long branch at back by 5.5 metres to even up the tree and make it more balanced.

T3 - Hawthorn - Cutting back of Hawthorn by 1.5 metre growth from previous cut 6 years ago. Remove ivy from trunk of Hawthorn.

TPO 977.pdf - A2 - that was passed to me recently states that there is a Hawthorn, Oak, Lime and Holly. As you can see on my map there are 2 large oaks a Hawthorn and quite a few Holly bushes, so not sure which ones are covered by the TPO.

It may help you to know that this is the electricity substation

These trees were last trimmed 6 years ago and in high winds there is a lot of debris and this falls on the pathway and although this cannot be eliminated completely we feel that canopy cleaning and removing deadwood will help with this.
