CAUTION: This email came from outside of the council - only open links and attachments that you're expecting.

Good morning Arleta,

Apologies for the delay in getting back to you over this.

Our clients are happy to go with the dark brown stain on the structure as requested.

With regard to the lighting our clients are now looking at installing new festoon lighting below the structure with approx. 60 low wattage pearl lamps to reduce the light spillage. The festoon lighting will be installed between the joists and they are proposing to install fascia boards to the ends that will assist further in reducing the light spillage. We hope this is now a more acceptable proposal.

With regard to the condition of a 9:00pm limit of usage our clients are currently liaising direct with EHO and other parties regarding this and are happy to adhere to any local restrictions with regard to its usage and any conditions imposed by the LA or police and would therefore ask that this is not imposed as a condition that they would then need to amend at a later date.

We look forward to hearing from you.

Regards

Hayley
