Dear Ms Donophy,

verge opp 7 Mengham Lane, Hayling Island, PO11 9JT

Application for proposed 5G telecoms installation: H3G 15m street pole and additional equipment cabinets

Thank you for your consultation on the above planning application. The Highway Authority wish to make the following comments.

The proposed location is on a grass verge along Mengham Lane. The verge is currently grass with a number of highway trees and a lighting column. From an arboricultural perspective, the works must be undertaken outside of the root protection area for the existing trees, with trees being protected and maintained from excavation and any associated construction works.

It is also requested that the proposed location is moved forward by at least 1.0m to be inline with the existing lighting column to not prejudice against any possible footway widening should this be a desire of the Highway Authority in the future.

Having regard to the above, the Highway Authority object to the proposed location of the 5G mast and associated equipment cabinets. It is requested that the mast is relocated further forward based on the above comments, and that further consideration is given to protect and maintain the existing trees from excavation and any associated construction works.

Yours sincerely,

Director of Hampshire 2050
Gary Westbrook
