Hi Graham,

It looks as though the two poplars referred to in TPO 1419 have been removed and two oak trees were planted to replace them. Street view shows the two oaks in June 2009. They appear to have been newly planted with weldmesh guards at that time, so I would have said they were most likely planted in winter 2008/09 or possibly winter 2007/08. That being the case, it's taken approx. 15 years for them to reach that size and I would object to their removal based on their current amenity value and future potential. Their loss in my mind would be unjustified and will have a negative impact on local amenity.
