

Joseph,

I am unclear on how this scheme differs materially to previous consent (other than the change to boundary treatments), and it appears that the D&A statement hasn't been added to IDOX to clear up the mystery. It's probably not material from my perspective, Environmental Health recommended discharge of APP/20/00551 c.12 (Contamination) in comments dated 16/01/2023 (our ref: CONS/22/03742), on the basis that the limited site investigation did not identify any contaminants of concern associated with the prior landuses.

The amended scheme would not change the risk status of the land, so no objections arise & no conditions or informatives are required.

Best Regards,

Jon
