5 Planning Considerations

- 5.1 As detailed in paragraph 3.1 above, this application has been submitted under Section 96A of the Town and Country Planning Act which allows a local planning authority to make a change to any planning permission if they are satisfied that the change is not material. The Government has advised that the requirements for design and access statements, publicity and consultation, and to take reasonable steps to identify unknown owners, would have applied to the original application if relevant. Therefore, those requirements do not apply to this type of application. The Government have advised that Local Planning Authorities must have regard to the effect of the change when determining where the proposal is a 'non-material' amendment.
- 5.2 Having regard to the relevant policies of the development plan it is considered that the main issues arising from this application are:
- (i) Principle of development
 - (ii) Appropriateness of design and impact on the character of the area
 - (iii) Effect on neighbouring properties
- (i) Principle of development
- 5.3 The application site is located within the defined urban area, therefore development is considered acceptable in principle subject to development control criteria.
- (ii) Appropriateness of design and impact on the character of the area
- 5.4 The proposal is deemed to be of appropriate design, inkeeping with the character of the area. It is worth noting the proposed changes would result in a smaller rear extension.
- (iii) Effect on neighbouring properties
- 5.5 The proposed changes are relatively modest and it is considered they are unlikely to lead to an adverse impact to neighbouring properties and can therefore be considered as non-material.

6 **Conclusion**

- 6.1 Overall, the proposed alterations to APP/21/00942 are not considered to result in a material change to the extant planning permission and the changes are recommended for approval.
-

7 **RECOMMENDATION:**
