

Thank you for your email alerting me to the new documentation.

I do not believe the hours mentioned in the email trail are correct, as hours advertised online differ completely (this is publicly available on social media but can send over if needed) these hours state two evenings per week until 7pm and one evening until 9:30pm making 3 evenings in total, and only one day advertised at the proposed 10-3:30 timeline. It also offers availability 5 days per week. The timings proposed also contradicts the times and numbers of the people who consistently park outside of our home for access to the business. 20-30 strangers outside of, and down the (Redacted) of our property via the (Redacted) alleyway per week does not equate to a suburban residential area.

Is there going to be any restrictions on hours trading if this is approved, to stop business hours being changed to more unsociable hours if the approval is granted? Because the current operational hours are not what has been proposed, which is obvious to anyone in the street, and the cars parked outside of ours, and many other neighbours properties are not consistent with those time frames.

We still maintain our objection to this on grounds of a complete lack of privacy within our own home, alongside the other objections aforementioned regarding the structure of the buildings and the lack of proper draining which has caused us problems within our property line with our garden flooding with all of the rain we have had recently. This was never an issue we had before.
