Introduction

This statement has been prepared to document the measures incorporated into the amended proposed siting of borehole 102 to ensure that the easements around a local sewer main in close proximity to the borehole have been fully complied with.

This statement should be read in conjunction with Site Layout Plan 2 of 2 (BH102 Construction Layout Plan) (ref. 760010-BH101&BH102-03).

Site layout and measures taken to protect the local sewer

The precise alignment of the sewer was mapped using a GPS tracker.

The following measures have been proposed to ensure the 3.5 metre sewer easement and emergency access would be maintained:

- Borehole 102 has been microsites 3.9 metres north of the sewer pipeline.
- A welfare van will be used to service which can be driven off-site outside of working hours to ensure the sewer pipeline is completely accessible in case emergency access is required at any time.
