Planning Application APP/22/01231 Land at, Palk Road, Havant

Redevelopment of a brownfield site to include the provision of 4No. Apartment blocks comprising of 90No. residential dwellings (including 27 affordable units) (Use class C3 residential), parking, public open space, landscaping and other associated works, including demolition of existing buildings on site, with access from Palk Road.

From a landscape perspective we have the following comments:

- A significant soft landscaping buffer and noise barrier fencing should be introduced to the north of the site. This is to form a mitigation strategy to manage the excessive sounds of the train track and Bedhampton station as well as creating a visual barrier to detached the development from the platform.
- The existing built form consist of pitched roofs and the proposed flat roofs are not in keeping with the existing built form, which is contrary to HBC design guides and policy CS16
- The site has opportunities to link up with Wayfarers Walk to the south west of the which would encourage sustainable transportation and satisfy planning policy CS1 Health and wellbeing. Supports the increased footpath and cycle use through the design of development, linkage and signage.
- The massing of the car parking should be broken up every 6 car and landscaping should be introduced in the form of trees and under planting. This is break up the overly hard landscaped areas.
- The site has poor pedestrian links from dwellings east to Palk Road. As a minimum we require

an off road footpath from each entrance of each building to the footways on Palk road.

- The proposed small triangles of verge by the visitor parking bays by the site entrance to be increased to form a decent sized planting area.

Kind regards,

Harry Mitchell CMLI
