For works to trees covered by a TPO

Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application MUST be accompanied by the necessary evidence to support your proposals (see guidance notes for further details).

4. What Are You Applying For?

Are you wishing to carry out works to tree(s) in a conservation area? ☐ Yes ☒ No

Documents and plans (for any tree)

A sketch plan clearly showing the position of trees listed in the question 'Identification of Tree(s) and Description of Works' MUST be provided when applying for works to trees covered by a Tree Preservation Order. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes).

It would also be helpful if you provided details of any advice given on site by an LPA officer.

Are you providing additional information in support of your application (e.g. an additional schedule of work for question 'Identification of Tree(s) and Description of Works')? ☒ Yes ☐ No

If Yes, please provide the reference numbers of plans, documents, professional reports, photographs etc in support of your application

Site Sketch
MBNL Radio Planner Request - Showing the trees and evidence of obstruction.
Site Visit Report - Location and identification of trees with photos.

5. Identification of Tree(s) and Description of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out.

You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work.

Where trees are protected by a Tree Preservation Order, please number them as shown in the First Schedule to the Tree Preservation Order where this is available. You should use the same numbering on your sketch plan (see help for sketch plan requirements).

Please provide the following information:

- Tree species
- The number used on the sketch plan); and
- A description of the proposed works.

Where trees are protected by a Tree Preservation Order you must also provide:

- Reasons for the work; and where trees are being felled
- Proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

e.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with one standard ash in same position.

Reduce the height of two oaks by 2m (T1 & T2) to 12m. Existing height of the trees is 14m.
My Client MBNL, a joint venture between EE and Three, are responsible for providing the infrastructure for the new Emergency Services Network and will be utilising their existing sites in order to build this Network. Details of their commitment to this project can be found at the following link: <https://www.gov.uk/government/publications/the-emergency-services-mobile-communications-programme/emergency-services-network#ee-coverage>. MBNL technicians have identified that these trees are causing an obstruction to their equipment and thereby affecting the coverage within the local area. The proposed reduction to these trees will restore full coverage to the network and ensure an efficient switch over from the current supplier of the Emergency Services Network (Airwave) to EE.

6. Tree Ownership

Is the applicant the owner of the tree(s)? ☐ Yes ☒ No

If No, please provide the address of the owner (if known and if different from the tree location):

☐ Yes ☒ No

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?
