

Hi Jenni

I am happy with the clarification provided and now understand better how the new windows will appear. This will be as follows:

- Front elevation, dormer windows – to be UPVC slider sash windows – same number of panes as existing
- Rear elevation – GF and FF sash windows - to be UPVC slider sash windows – same number panes as existing
- Rear elevation – 2x casement windows – to be UPVC same style of opening as existing and same number of panes as existing

I raise no objection to the above. Given the absense of proposed elevations, can we make reference to the applicant's email in the approved plans conditions so we have something to fall back on if the owner decides to inset completely different windows?

Thanks

Rachael
