Dear Sir/Madam,

Land raising of the recreation ground at Hobby Close Field using inert clean soil material to solve inherent drainage problems in ground and provision of sports field. Temporary construction routes from Eagle Avenue to the east and north of the site. These works would also allow for new play area and skate park to replace the existing ones on site (the play area and skate park works do not require planning permission at Recreation Ground, Hobby Close, Wecock, Waterlooville (Application No. APP/20/00285

Hampshire County Council as Lead Local Flood Authority has provided comments in relation to the above application in our role as statutory consultee on surface water drainage for major developments.

This response does not reflect the position of Hampshire County Council as the Highway Authority. If there is a potential for the drainage features to be offered for adoption, this will need to be discussed separately with Highways development planning as they might not be considered acceptable by the Highway Authority.

In order to assist applicants in providing the correct information to their Local Planning Authority for planning permission, Hampshire County Council has set out the information it requires to provide a substantive response at <https://www.hants.gov.uk/landplanningandenvironment/environment/flooding/planning>

The County Council has reviewed the following documents relating to the above application:

- Pre-Commencement Conditions cover letter (Havant BC, 12/1/23)

Director of Universal Services
Patrick Blogg

We consider that the information provided is sufficient to address our comments and as such we have no objection to the discharge of condition 7.

This response has been provided using the best knowledge and information submitted by the applicant as part of the planning application at the time of responding and is reliant on the accuracy of that information.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'T. Callaway', with a stylized flourish at the end.

Thomas Callaway
Flood and Water Management Engineer
