Hi Lesley,

Please find attached the higher resolution light spill diagram as requested within the County Ecologist's comments.

I will also forward this directly to him as part of my communication to set up dialogue between him and our ecologist.

Kind regards,

Michael Saunders – Partner

Hi Paul/ Toby,

We've had feedback from the County Ecologist (see below) and he has commented:

“Given the importance of this area to nocturnal species such as Hazel Dormice and bats, and the presence of various notable invertebrate species, the impacts of artificial lighting are potentially significant. The submitted Lighting Strategy (WSP, December 2022) contains a lux contour plan (at Appendix B): this plan is blurry and I am unable to clearly read it and determine the lux levels at each illustrated contour. I would request that a high-resolution plan is submitted before I provided further comment.”

Could you send me copies of the plans within your report at a higher resolution so his request can be met.

Kind regards,

Michael Saunders – Partner
