## Tree Report

### Fleet Farm

Yew Tree Road Hayling Island Hampshire PO110QE.

28<sup>th</sup> July, 2020

By Kim Gifford Arboricultural Consultant

## **1.1 Tree Inspection commenced:**

28<sup>th</sup> July 2020 by Mr Kim Gifford Arboricultural Consultant.

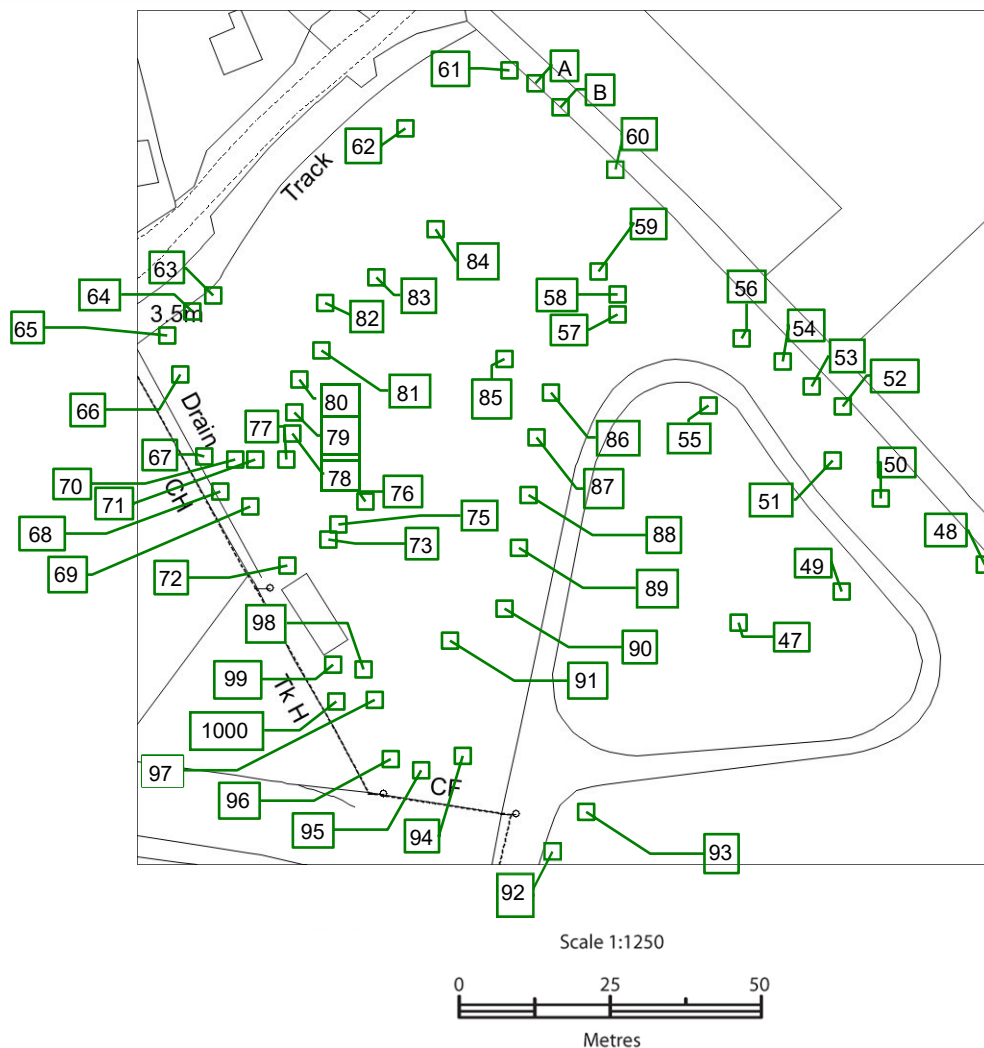

**1.2 Methods:** Visual Tree Inspection references: Principles of Tree hazard Assessment and Management by David Lonsdale and The body language of trees by Claus Mattheck and Helge Breuer. The Arboricultural Association guidance note 7 Tree Surveys A Guide to good practice. LANTRA awards Professional Tree Inspection. No soil tests or trail holes have been undertaken. This inspection was by visual observation only.

**1.3 Brief:** Arboricultural inspection and recommendations for Fleet farm touring and camping park.

**1.4 General description:** This site consists of predominately mature 53 English Oaks (*Quercus robur*). They are in general very mature between the ages of 60 to 100+ estimated years old and normal for this genera. The majority have a stunted form due to coastal winds. There is evidence of previous pruning throughout most of the crowns. Most of the Oaks have had major deadwood removed in the recent past. There is evidently some decay and cavities overall. This area will require regular inspection at least annually because of the nature of use.

**Note:** Oak number 9058 has a colony of Bees nesting at 6m in the upper crown works should only undertake to this specimen in the dormant season to avoid disturbance.

**1.5 Tree Survey:** The following tree survey details tree attributes, dimensions, physiological, structural, risk and recommendations by priority/re-inspection cycle. The key below has been applied to data collected on each individual tree. Each tree has been tagged with a silver disc attached at approximately 2m from ground level. The plan tree numbers are prefixed with 90## except for tag 1000. There are two Oaks on the northern boundary 'A & B' that have not been tagged but included as they are adjacent to the 'Play Area'.

Reproduction in whole or in part is prohibited without the Date Of Issue: 27 August 2015 prior permission of Ordnance Survey. Supplied By: Getmapping

Supplier Plan Id: 148946\_1250  
OS License Number: 100030848  
Applicant: Kim Gifford

The representation of a road, track or path is no evidence of a right of way.

The representation of features as lines is no evidence of a property boundary.

Tree Survey Fleet Farm Yew Tree Rd, Hayling Island, Hampshire  
PO11 0QE.

To be read in conjunction with Tree Report 28<sup>th</sup> July 2020 by  
Kim Gifford Arboricultural Consultant kim@treetesting.com  
07831488456.

All Trees tagged with a silver disc prefixed with 90## at approx. 2m  
(Some now missing)

**Age Key:** Y- young tree= Tree less than 10 years old approx.

YM-Young Mature= Tree no older than 25% of the species normal life expectancy

M-Mature= Tree between 26 and 100% of the species normal life expectancy

OM-Over mature=Tree of greater than 100% of the species normal life expectancy

V-Veteran=Tree of interest; biological, aesthetically or culturally due to age

**Priority Key:** 1. URGENT= imminent health and safety threat immediate action required

2. High Priority= required to address POTENTIAL health and safety threat – Within 6 months.

3. Moderate= Required for Good Arboricultural Practice – Within 1 year.

4. Low= Good Arboricultural Practice – No health and safety or tree structure threat – At owners discretion.

**Re-inspection Cycle Key:**

High: Approx. 6 months to re-assess recognised defect

Moderate: Approx. 12 to 18 months

Low: Approx. 3 to 5 years

**1.6 Recommendations:** The following summarises identified remedial works to be undertaken within the next 6 months refer to tree survey data below. All tree work should be undertaken to BS3998; 2010 recommendations for tree work and within the wildlife protection act specifications (i.e. nesting birds and bats etc.) Note: All trees within this site requires tree preservation order permission from the local authority before tree work commences. Works should be undertaken during the dormant season.

**1. All Oaks within this site require major deadwood to be removed.**

**2. Oak trees 85, 84, 83 , 69, 62, A, B, 60,59, 58, 57, 54, 53, 52, 51, require crown reductions by 2m to 3m overall : Reason to maintain the safety in this area and reduce the possibility of failure. .**

## 1.7 Tree Survey Data:

Tree Number: 1000      Date: 180815      Surveyor: Kim Gifford      Client: Fleet farm

Site: Caravan Park

Tree/ Species: Oak      Age class: M      Height: 12m dbh: 60cms Crown spread: N 4m E 4m S 4m W 4m

Target: High

General Observation: Dying back

Base: Normal

Stem: Normal

Crown: deadwood

Foliage: Fair

Recommendation: **deadwood**

Priority: 2

Re-inspect: Low

Tree Number: 0999      Date: 180815      Surveyor: Kim Gifford      Client: Fleet farm

Site: Caravan Park

Tree/ Species: Oak      Age class: M      Height: 12m dbh: 50cms Crown spread: N 4m E 4m S 4m W 4m

Target: High

General Observation: (Form) Poor

Base: decay/cavity

Stem: bark wound north side stub

Crown: Minor deadwood / branch wound

Foliage: good
