

Design and Access Statement for A 3 bay Garage

We would like to apply to build a three bay garage at our house of Antrims Barn, St Peters Road, Hayling Island.

The Barn conversion was recently completed at Antrims Barn. There was a permission for a brick garage however this seems undesirable to ourselves as we feel it was of a modern appearance and would not fit in with the surrounding rural theme of timber and bricks. Its location on the site is also impractical. This application was App 07/62510/002 | Conversion of existing barn to dwelling house and erection of detached garage. | Antrims Barn, St Peters Road, Hayling Island, PO110RT

We would like to apply to build a new three bay garage in the front of Antrims Barn. We have situated the garage to the south side of the site and designed it to fit in well with the building line of the village hall and neighbouring house to the north. This will also not interfere with the view of the listed barn from the road.

We designed the garage to carry some features of the rural area including green oak post and slate roof and timber cladding.

We chose materials of slate roof to match in with surrounding properties and timber cladding with brick wall to match in with Antrims Barn. The windows will be black aluminum.

We want to use green oak posts to provide a rural theme to the garage frontage and will have open eave detail similar to Antrims Barn.

We will erect a 6ft closeboard fence between the garage and the village hall.

The container to the west of the site will be removed and contents transferred to the new garage.

The Garage will be accessed by the current established access onto the private side road that then leads onto St Peters Road.

Previous application advice from mr fellows (conservation officer) has been followed

Mr & Mrs SR Wilson
