

This development is at the top of Westland Drive at the narrowest part.

As you look down Westland Drive, the land slopes from left to right.

The first two houses on the right (Numbers have their lower floors starting below the level of the road.

This development will seriously overlook our lounges and, possibly, our bedrooms.

It will also dramatically reduce the amount of light received in our lounges/front gardens in December and January.

(The new development on the former Purbrook Park School playing field has already done this, but the houses are 'sideways' on.)

(The trees that were between there and Westland Drive have already been removed)

The top of Westland Drive is very narrow and recent heavy plant deliveries have meant driving on the right hand pavement to get past.

This is dangerous considering that Crookhorn School is across the main road and Westland Drive is a 'pick-up' zone with the double yellow lines being ignored!!!

It is also a 'blind corner' as you turn in from the Crookhorn direction. Cars are often forced across the road onto the wrong side. Heavy Plant will exacerbate this!

So far, the builder has been working at weekends (very noisy) and it would be intolerable (noise abatement) if he worked seven days a week on the (already underway) construction.

He has also been working in the evenings as they have got lighter.....this is not acceptable.

The left hand side of the road is already a pot-hole disaster because (or in spite) of the heavy machinery.
