

North
Elevations
Proposed

Architectural drawing of the North Elevation of a proposed building. The drawing shows a two-story structure with a flat roof and two square skylights. The second floor has three rectangular windows with decorative mullions. The first floor features a large glass entrance on the left and a long horizontal window on the right. A small gabled structure is attached to the right side of the first floor. A vertical line indicates the center of the building.

North
Elevations
Existing

Architectural drawing of the North Elevation of an existing building. The drawing shows a two-story structure with a gabled roof. On the left, there is a chimney. The second floor features three windows, each with a transom. The first floor has a large double door on the left, a single window with a transom in the center, and a side door on the right. A dark shadow is cast across the lower left portion of the facade.

Existing

This architectural drawing shows the existing building's elevation. It is a two-story structure with a gabled roof. On the left side, there is a large window on the second floor and a garage door on the first floor. The central entrance features a small portico supported by columns. To the right of the entrance, there is a vertical strip of windows. On the far right, a chimney is visible. The drawing uses simple lines to represent the building's form and features.

Existing Ridge Height @ 8600

Existing Ridge Height @ 38 degrees

Architectural elevation drawing of a house. The house features a gabled roof with a chimney on the left side. The main body of the house is white, and there is a small porch on the right side. The drawing is a line art representation with some grey shading for the porch and chimney.

This is a black and white architectural elevation drawing of a house. The main structure has a gabled roof with a chimney on the left side. The chimney is depicted with a dark, shaded section. To the right of the main house is a smaller, single-story addition with a flat roof and a door. The drawing uses simple lines and shading to represent the building's form and features.
