Attachments: 20201125 Formal Recommendation - APP-20-00991 - Havant Thicket adj Sir George Staunton Country Park Middle Park Way.pdf

For the attention of: Lewis Oliver

Site: Havant Thicket, adjacent to Sir George Staunton Country Park, Middle Park Way, Havant, PO9 4NX

Proposal: Outline application for (matters to be considered outlined in Table 2.2 in the submitted Development Specification) development of a new pipeline to transfer water from Bedhampton Springs to fill the reservoir in the winter and draw it off to treat and supply when needed in the summer comprising: Construction of an underground, bi-directional pipeline linking the reservoir with the existing pumping station at Bedhampton; Emergency drawdown discharge structure at Hermitage Stream; Upgrades to existing culverts; Washout and air valve chambers (typically below ground).

Application Number: APP/20/00991

Our Reference: 89676 (Tracker No: 11839)

Dear Lewis,

Thank you for your letter, dated 16th November 2020, regarding the above application.

Highways England has been appointed by the Secretary of State for Transport as strategic highway company under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the strategic road network (SRN). The SRN is a critical national asset and as such Highways England works to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long-term operation and integrity.

In the case of this development proposal, our interest is in the A3(M) and A27.

Having examined the above application we do not offer an objection to the proposal. However, we request that construction trips are, where practicable, minimised during the weekday peak periods to reduce their impact on the Strategic Road Network and its junction. Careful consideration should also be given the construction phasing of the pipeline, including any required road closures, to ensure that it does not add to any construction impacts from other developments or schemes in vicinity of the proposed pipeline, such as for example the proposed AQUIND Interconnector scheme that is currently progressing through its DCO examination. Therefore, we propose a Construction Traffic Management Plan be conditioned which is set out below and in our attached response:

1. No development shall take place until a detailed Construction Traffic Management Plan has been submitted to and approved in writing by the Local Planning Authority (in consultation with Highways England).

Reason: To mitigate any adverse impact from the development on the A3(M). To ensure that the A3(M) continues to be an effective part of the national system of routes for through traffic in accordance with section 10 of the Highways Act 1980 and to satisfy the reasonable requirements of road safety.

Kind Regards,
Glen

Glen Strongitharm

Developments Affecting Trunk Roads and Special Roads

Highways England Planning Response (HEPR 16-01)

Formal Recommendation to an Application for Planning Permission

From: Divisional Director
Network Delivery and Development
South East Region
Highways England.
PlanningSE@highwaysengland.co.uk

To: Havant Borough Council – FAO Lewis Oliver

CC: transportplanning@dft.gov.uk
Spatialplanning@highwaysengland.co.uk

Council's Reference: APP/20/00991

Referring to the outline planning application for (matters to be considered outlined in Table 2.2 in the submitted Development Specification) development of a new pipeline to transfer water from Bedhampton Springs to fill the reservoir in the winter and draw it off to treat and supply when needed in the summer comprising: Construction of an underground, bi-directional pipeline linking the reservoir with the existing pumping station at Bedhampton; Emergency drawdown discharge structure at Hermitage Stream; Upgrades to existing culverts; Washout and air valve chambers (typically below ground)." referenced above, dated 16 November 2020 at Havant Thicket, adjacent to Sir George Staunton Country Park, Middle Park Way, Havant, PO9 4NX. Notice is hereby given that Highways England's formal recommendation is that we:

- ~~a) offer no objection;~~
- b) recommend that conditions should be attached to any planning permission that may be granted (see Annex A – Highways England recommended Planning Conditions);**
- ~~c) recommend that planning permission not be granted for a specified period (see Annex A – further assessment required);~~

~~d) recommend that the application be refused (see Annex A – Reasons for recommending Refusal).~~

Highways Act Section 175B is not relevant to this application.¹

This represents Highways England formal recommendation and is copied to the Department for Transport as per the terms of our Licence.

Should you disagree with this recommendation you should consult the Secretary of State for Transport, as per the Town and Country Planning (Development Affecting Trunk Roads) Direction 2018, via transportplanning@dft.gov.uk.

Annex A Highways England recommended Planning Conditions /

HIGHWAYS ENGLAND (“we”) has been appointed by the Secretary of State for Transport as strategic highway company under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the Strategic Road Network (SRN). The SRN is a critical national asset and as such works to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long-term operation and integrity.

This response represents our formal recommendations with regard to the Havant Thicket, adjacent to Sir George Staunton Country Park, Middle Park Way, Havant, PO9 4NX application and has been prepared by Glen Strongitharm.

Highways England has no objection to the Outline application for (matters to be considered outlined in Table 2.2 in the submitted Development Specification) development of a new pipeline to transfer water from Bedhampton Springs to fill the reservoir in the winter and draw it off to treat and supply when needed in the summer comprising: Construction of an underground, bi-directional pipeline linking the reservoir with the existing pumping station at Bedhampton; Emergency drawdown discharge structure at Hermitage Stream; Upgrades to existing culverts; Washout and air valve chambers (typically below ground) subject to the below proposed planning condition to mitigate the impact on the A3(M) by the development proposal:

1. No development shall take place until a detailed Construction Traffic Management Plan has been submitted to and approved in writing by the Local Planning Authority (in consultation with Highways England).

Reason: To mitigate any adverse impact from the development on the A3(M). To ensure that the A3(M) continues to be an effective part of the national system of routes for through traffic in accordance with section 10 of the Highways Act 1980 and to satisfy the reasonable requirements of road safety.
