Subject: RE: Planning Application APP/20/01093 Land at Sinah Lane, Hayling Island

Dear Mrs Haywood,

APP/20/01093: Land at Sinah Lane, Hayling Island: Erection of 195No. dwellings, associated open space, pumping station, sub-station and formation of new vehicular access off Sinah Lane. Change of use of land from agricultural to a Wader and Brent Geese Refuge Area

Thank you for your consultation. I note that it is a resubmission of a previous application, 18/00724. I would draw you attention to the Planning statement addendum submitted, and to section 3 which states the changes in the present application from the original application. These changes do not materially alter the impact of the development on archaeological remains, therefore I would reiterate the archaeological advice provided in relation to the previous application.

I note that the archaeological desk based assessment is also resubmitted and references previously made remain applicable. This DBA concludes that:

‘6.3 There are no designated archaeological assets on or particularly near to the study site. The study site has remained undeveloped agricultural land throughout the historic periods.

6.4 A review of available archaeological and historical sources indicates that the site has a moderate archaeological potential for the Roman periods and a low to moderate potential for the later Prehistoric. A low archaeological potential is identified for evidence from all other past periods of human activity.

6.5 Based on the results of the recent archaeological evaluation a short distance to the east of the site, it is considered that the proposed development of the site is unlikely to have a widespread or significant archaeological impact upon any undiscovered archaeological heritage assets within the site boundary.

6.6 However, due to the size of the study site and the low to moderate archaeological potential for later Prehistoric and Roman evidence, it is considered likely that the Hampshire County Council Archaeological Officer will take a precautionary approach and seek field evaluation of the site.

6.7 On the basis of all the available evidence we would suggest that any requirement for further archaeological evaluation could follow planning consent secured by an archaeological planning condition.’

I would concur with these conclusions and therefore while there is no indication that archaeology presents an overriding concern I would advise that the assessment, recording and reporting of any archaeological features affected by construction be secured through the attachment of suitable conditions to any planning consent that might be granted. For instance:

1) That no development shall take place until the applicant has secured the implementation of a programme of archaeological assessment in accordance with a Written Scheme of Investigation that has been submitted to and approved by the Planning Authority. The assessment should take the form of trial trenches located across the proposed area of housing to ensure that any archaeological remains encountered within the site are recognised, characterised and recorded.

Reason: To assess the extent, nature and date of any archaeological deposits that might be present and the impact of the development upon these heritage assets.

2) That no development shall take place until the applicant has secured the implementation of a programme of archaeological mitigation of impact, based on the results of the trial trenching, in accordance with a Written Scheme of Investigation that has been submitted to and approved by the Planning Authority.

Reason: To mitigate the effect of the works associated with the development upon any heritage assets and to ensure that information regarding these heritage assets is preserved by record for future generations.

3) Following completion of archaeological fieldwork a report will be produced in accordance with an approved programme submitted by the developer and approved in writing by the local planning authority setting out and securing appropriate post-excavation assessment, specialist analysis and reports, publication and public engagement.

Reason: To contribute to our knowledge and understanding of our past by ensuring that opportunities are taken to capture evidence from the historic environment and to make this publicly available.

If you have any further queries regarding this application, then please do not hesitate to contact me.

Yours sincerely,

David Hopkins
(County Archaeologist)

Hampshire County Council
Economy, Transport and Environment Department

Telephone 0370 779 8025

Due to COVID I am presently working from home but can be contacted by email and on the phone number above.

Subject: Planning Application APP/20/01093 Land at Sinah Lane, Hayling Island

This email is a consultation request regarding a planning application, reference APP/20/01093. The attached letter contains contact details should you wish to discuss the application with the Case Officer.

To see the details of the application and associated documents on Havant Borough Council's Public Access pages, follow [this link](#).

If you require any further information please email planning.development@havant.gov.uk or telephone (023) 9244 6513.

Notes for Consultees using Consultee In Tray on Public Access

You will be able to access the full range of services on Public Access by using the Consultee In Tray which can be found under the My Profile tab.

Consultee Access allows you to see documentation that is not in the public domain (usually our pre-application enquiries) and saves your previous consultation responses.

If you have not yet registered your details on the website, please follow the instructions online and then email planning.development@havant.gov.uk to allow us to activate your consultee access and if you are experiencing problems with your access please let us know.

We can provide a User Guide on request.
