

Planning Application APP/20/01127 Mill Rythe Holiday Village, 16 Havant Road, Hayling Island, PO11 0PB

Thank you for your consultation. I note in the planning statement, para 3.5, that the archaeological condition relating to archaeological assessment was addressed when the initial development commenced in August 2017. I note in our records that the result of the archaeological assessment were shared with us in September 2017 and on the 7th September 2017 my colleague Mr Adam, having reviewed the results of the archaeological assessment, advised the applicant's archaeological consultant that he was happy to endorse that report to the planning authority if submitted. He also confirmed that in light of the results it was his opinion that no further archaeological work was merited and that he would not raise any archaeological objection to the discharge of the archaeological conditions. I assume therefore that the results of the archaeological assessment were formally submitted and that the archaeological conditions were discharged.

I would not raise any archaeological issues in relation to this planning application,

Yours sincerely

David Hopkins
County Archaeologist
