

INFORMATION ON WOOD FIRE STOVE

The Charnwood Aire 5 delivers a comfortable 4kW of heat to the room with a crystal clear burn and remarkable controllability. Deliberately designed to maximise the view of the fire the minimal styling of the Aire fits comfortably into virtually any fireside situation whether it be freestanding or within a traditional fireplace.

The latest burning technology for enhanced efficiency
The Aire 5 incorporates Charnwood's unique BLU burning technology. Not only a vast improvement on the new 2022 Ecodesign standards, BLU also meets with Defra exemption limits; allowing wood to be burnt cleanly and safely in smoke control areas.
