Dear sir

Your ref:APP/22/00105

7 Tudor Avenue, Emsworth PO107UG

With regard to your recent communication regarding the proposed extension to the above premises. I would like to make the following objections.

Firstly, when the present garage wall is extended lengthwise it will cross the full length of my living room window and the height will be (as far as I can judge) to the top of the window which will mean that my window will be fully blocked and therefore, as the wall is approximately 6.5 feet away from the window, will severely restrict the amount of daylight into the room making the room very dark and will therefore restrict the usage of this room.

Secondly one of the bedrooms is already affected by the garage wall (as shown in photograph) and when the garage wall is extended this will further cut down on the daylight this room receives.

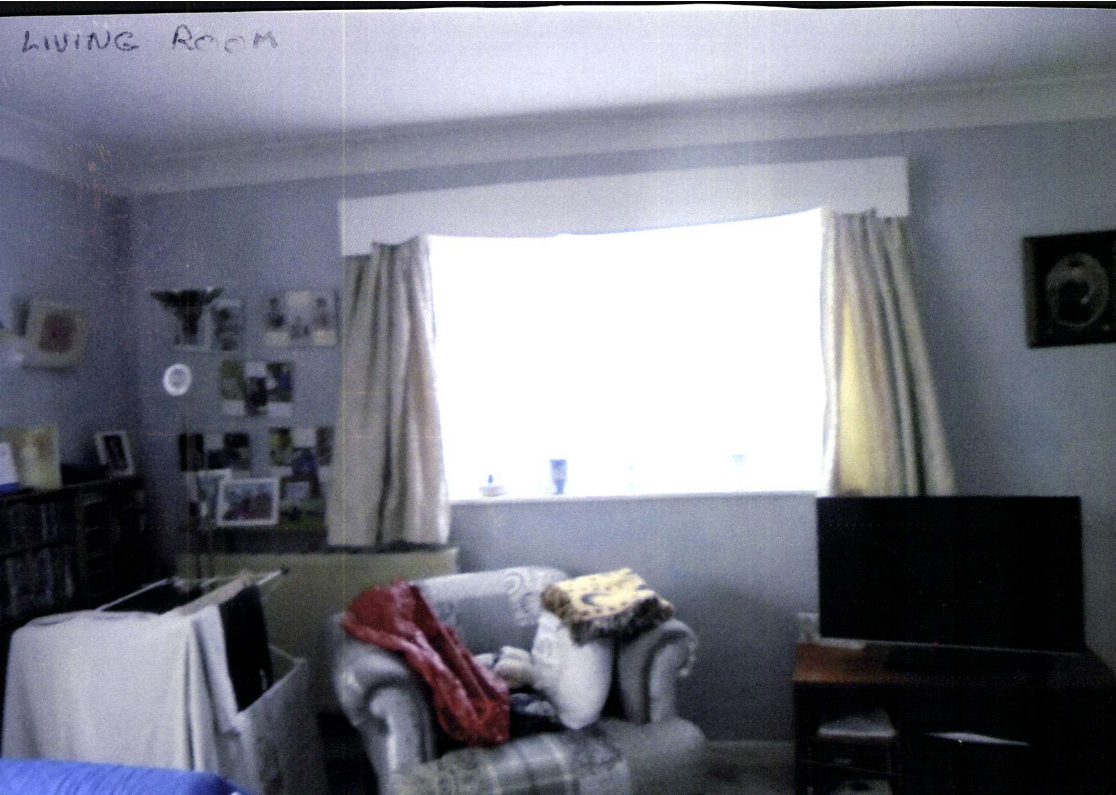

The last part of my objection is that it will be very unpleasant viewing a brick wall so close to the window, in fact it will be rather depressing.

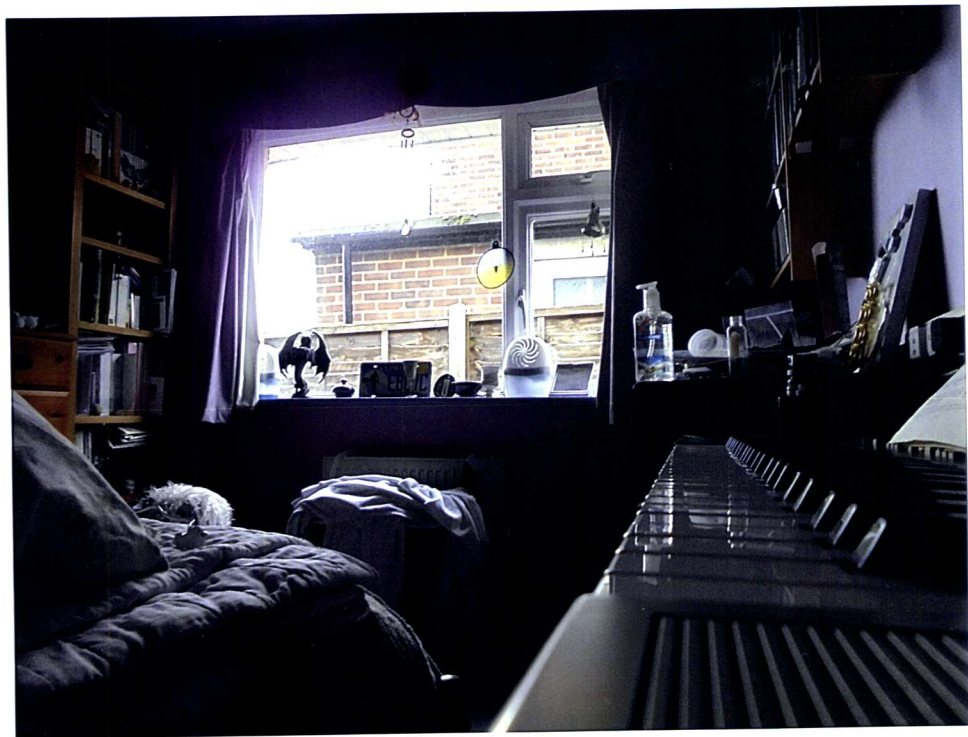

Yours faithfully

Irene Owen
