Dear Sir,

Power Generation Facility, Southmoor Lane Havant

Erection of a flexible power generation facility with associated ancillary infrastructure, access and boundary treatment

Further to the Highway Authority's response dated 19th October, the applicant has provided further information to address the comments raised.

The maximum number of expected HGV movements to the site will be 8 (two-way) over a 7 day period. When averaged across the course of the week, the HGV movements are minimal and therefore considered acceptable. Additionally, 1-2 vans will be visiting the power generation facility every week. The Highway Authority are satisfied that these additional movements will not have a detrimental impact on highway safety or operation.

The current occupier of the site has also provided confirmation that the new facility will not impinge on the operation of the lorry park. The tracking drawings provided demonstrate that the generation facility will be suitably setback so as not to impact on existing HGV movements to the site.

Following the provision of the additional information noted above, the Highway Authority recommend no objection to the proposed development.

*Director of Economy, Transport and Environment
Stuart Jarvis BSc DipTP FCIHT MRTPI*

Yours sincerely,

Chris Hirst
