Your ref APP/21/00429

Dear Sir/Madam

We refer to the above application.

We understand that the proposal plan will start from in front of the existing house. This will affect our daylight in our bay window and front room as well as the privacy and daylight in our front garden.

The height of the proposal will affect our daylight and privacy in our back garden where we use a summer house and eating area.

The Dormer windows proposed on the east elevation will overlook us in our rear conservatory where we dine and use as a living area, intruding on our privacy. This will also take daylight away from the conservatory which measures 4.5 metres in depth and 6.5 metres in length. Furthermore this also will affect the daylight into our kitchen window and we object to this proposal.

We also note that there will not be a garage and some parking will be along the east elevation which will cause fumes and noise pollution to us.

Yours Faithfully

Mr AA Campbell

Mrs PB Campbell
