

False colours set to 50lx. Plan view displaying sharp cut-off around perimeter luminaires to baffles, and maximum illuminance levels around entrances and circulation roads.

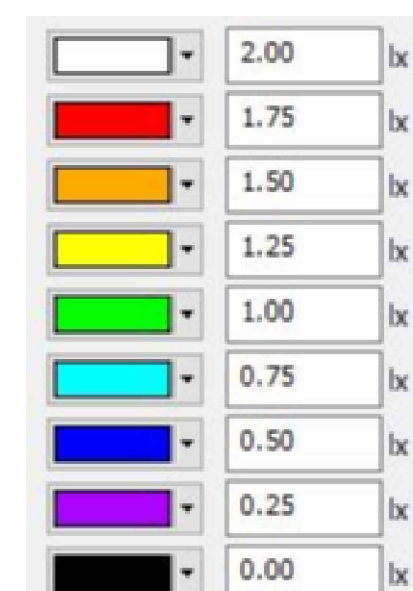

RENDER LUX LEVEL PLOT VIEW FROM ABOVE

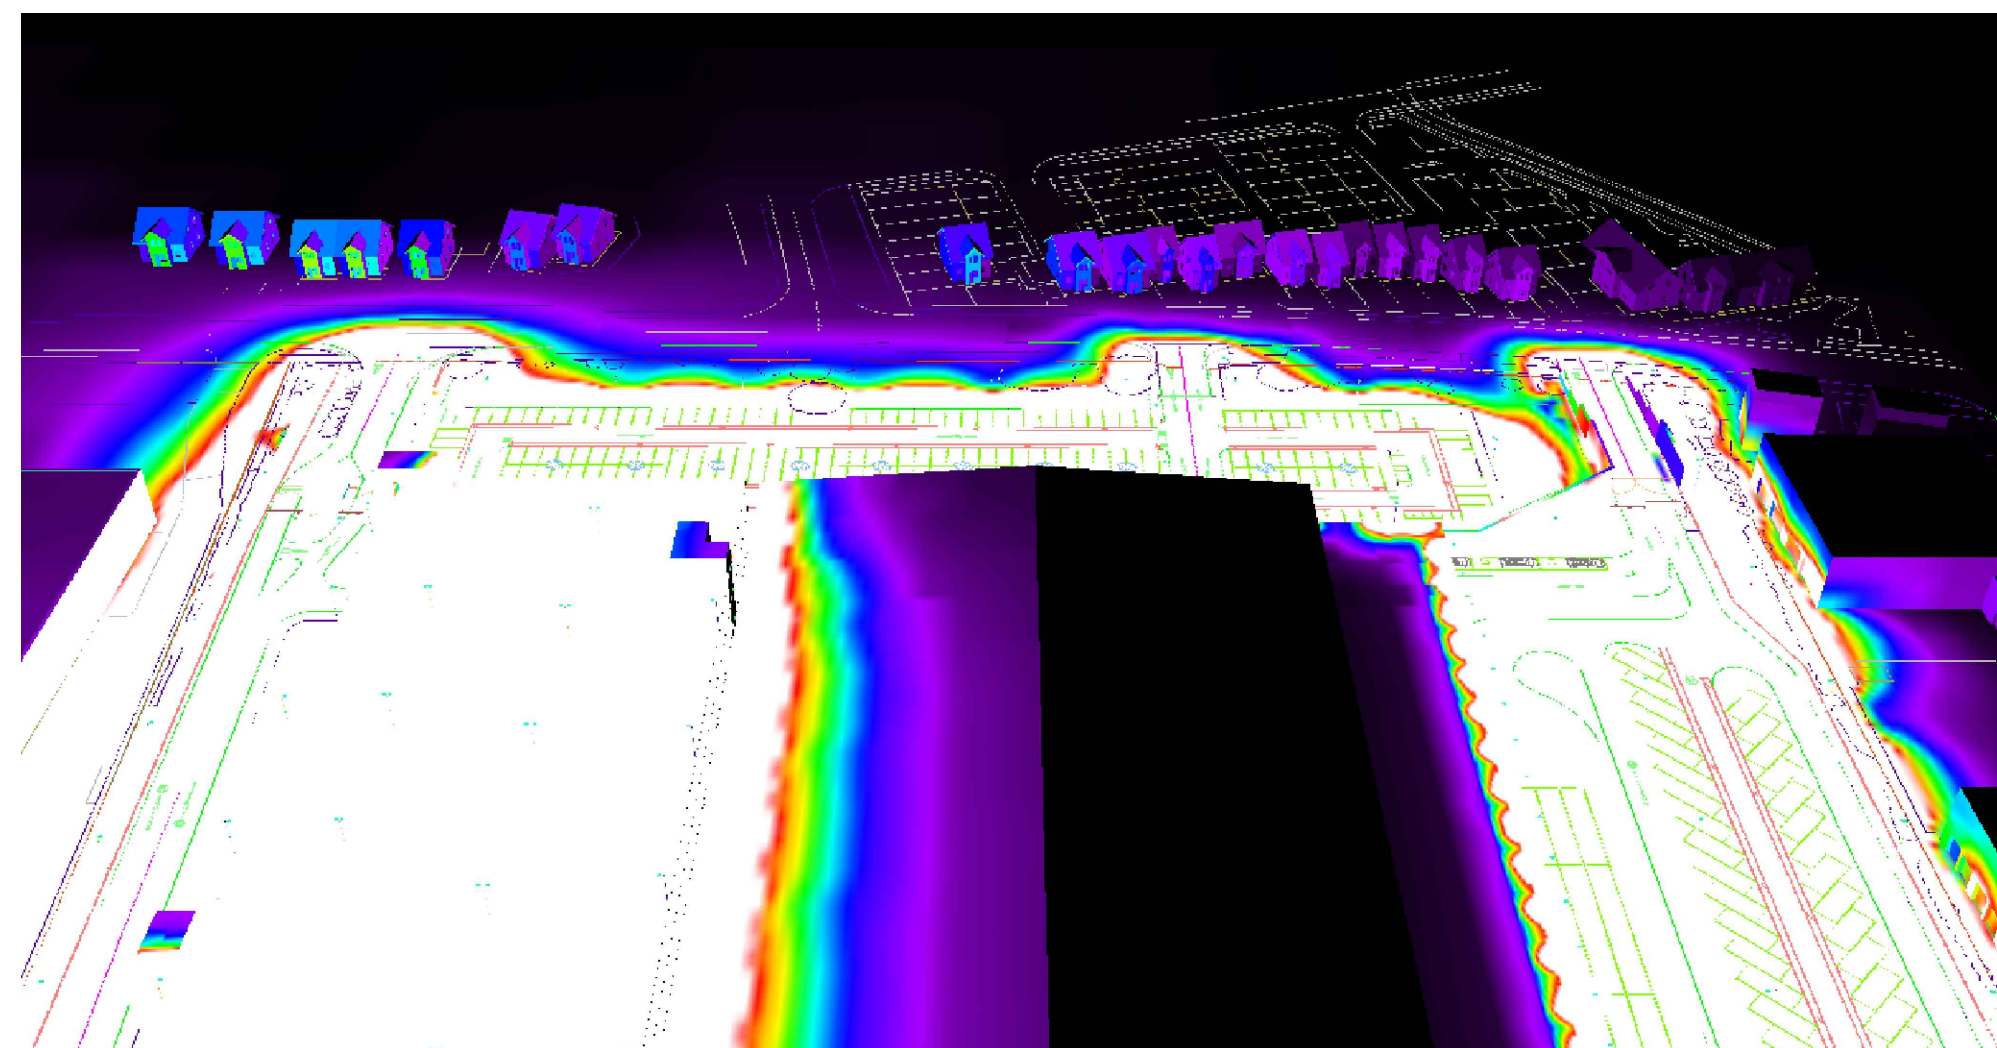

Render facing canopy, service yard and open van parking.

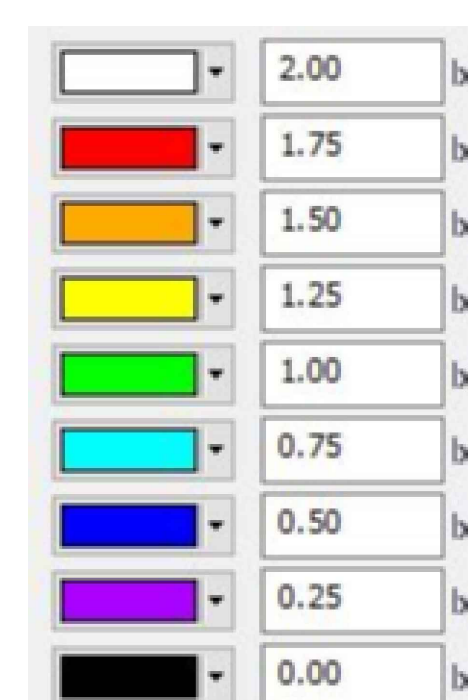

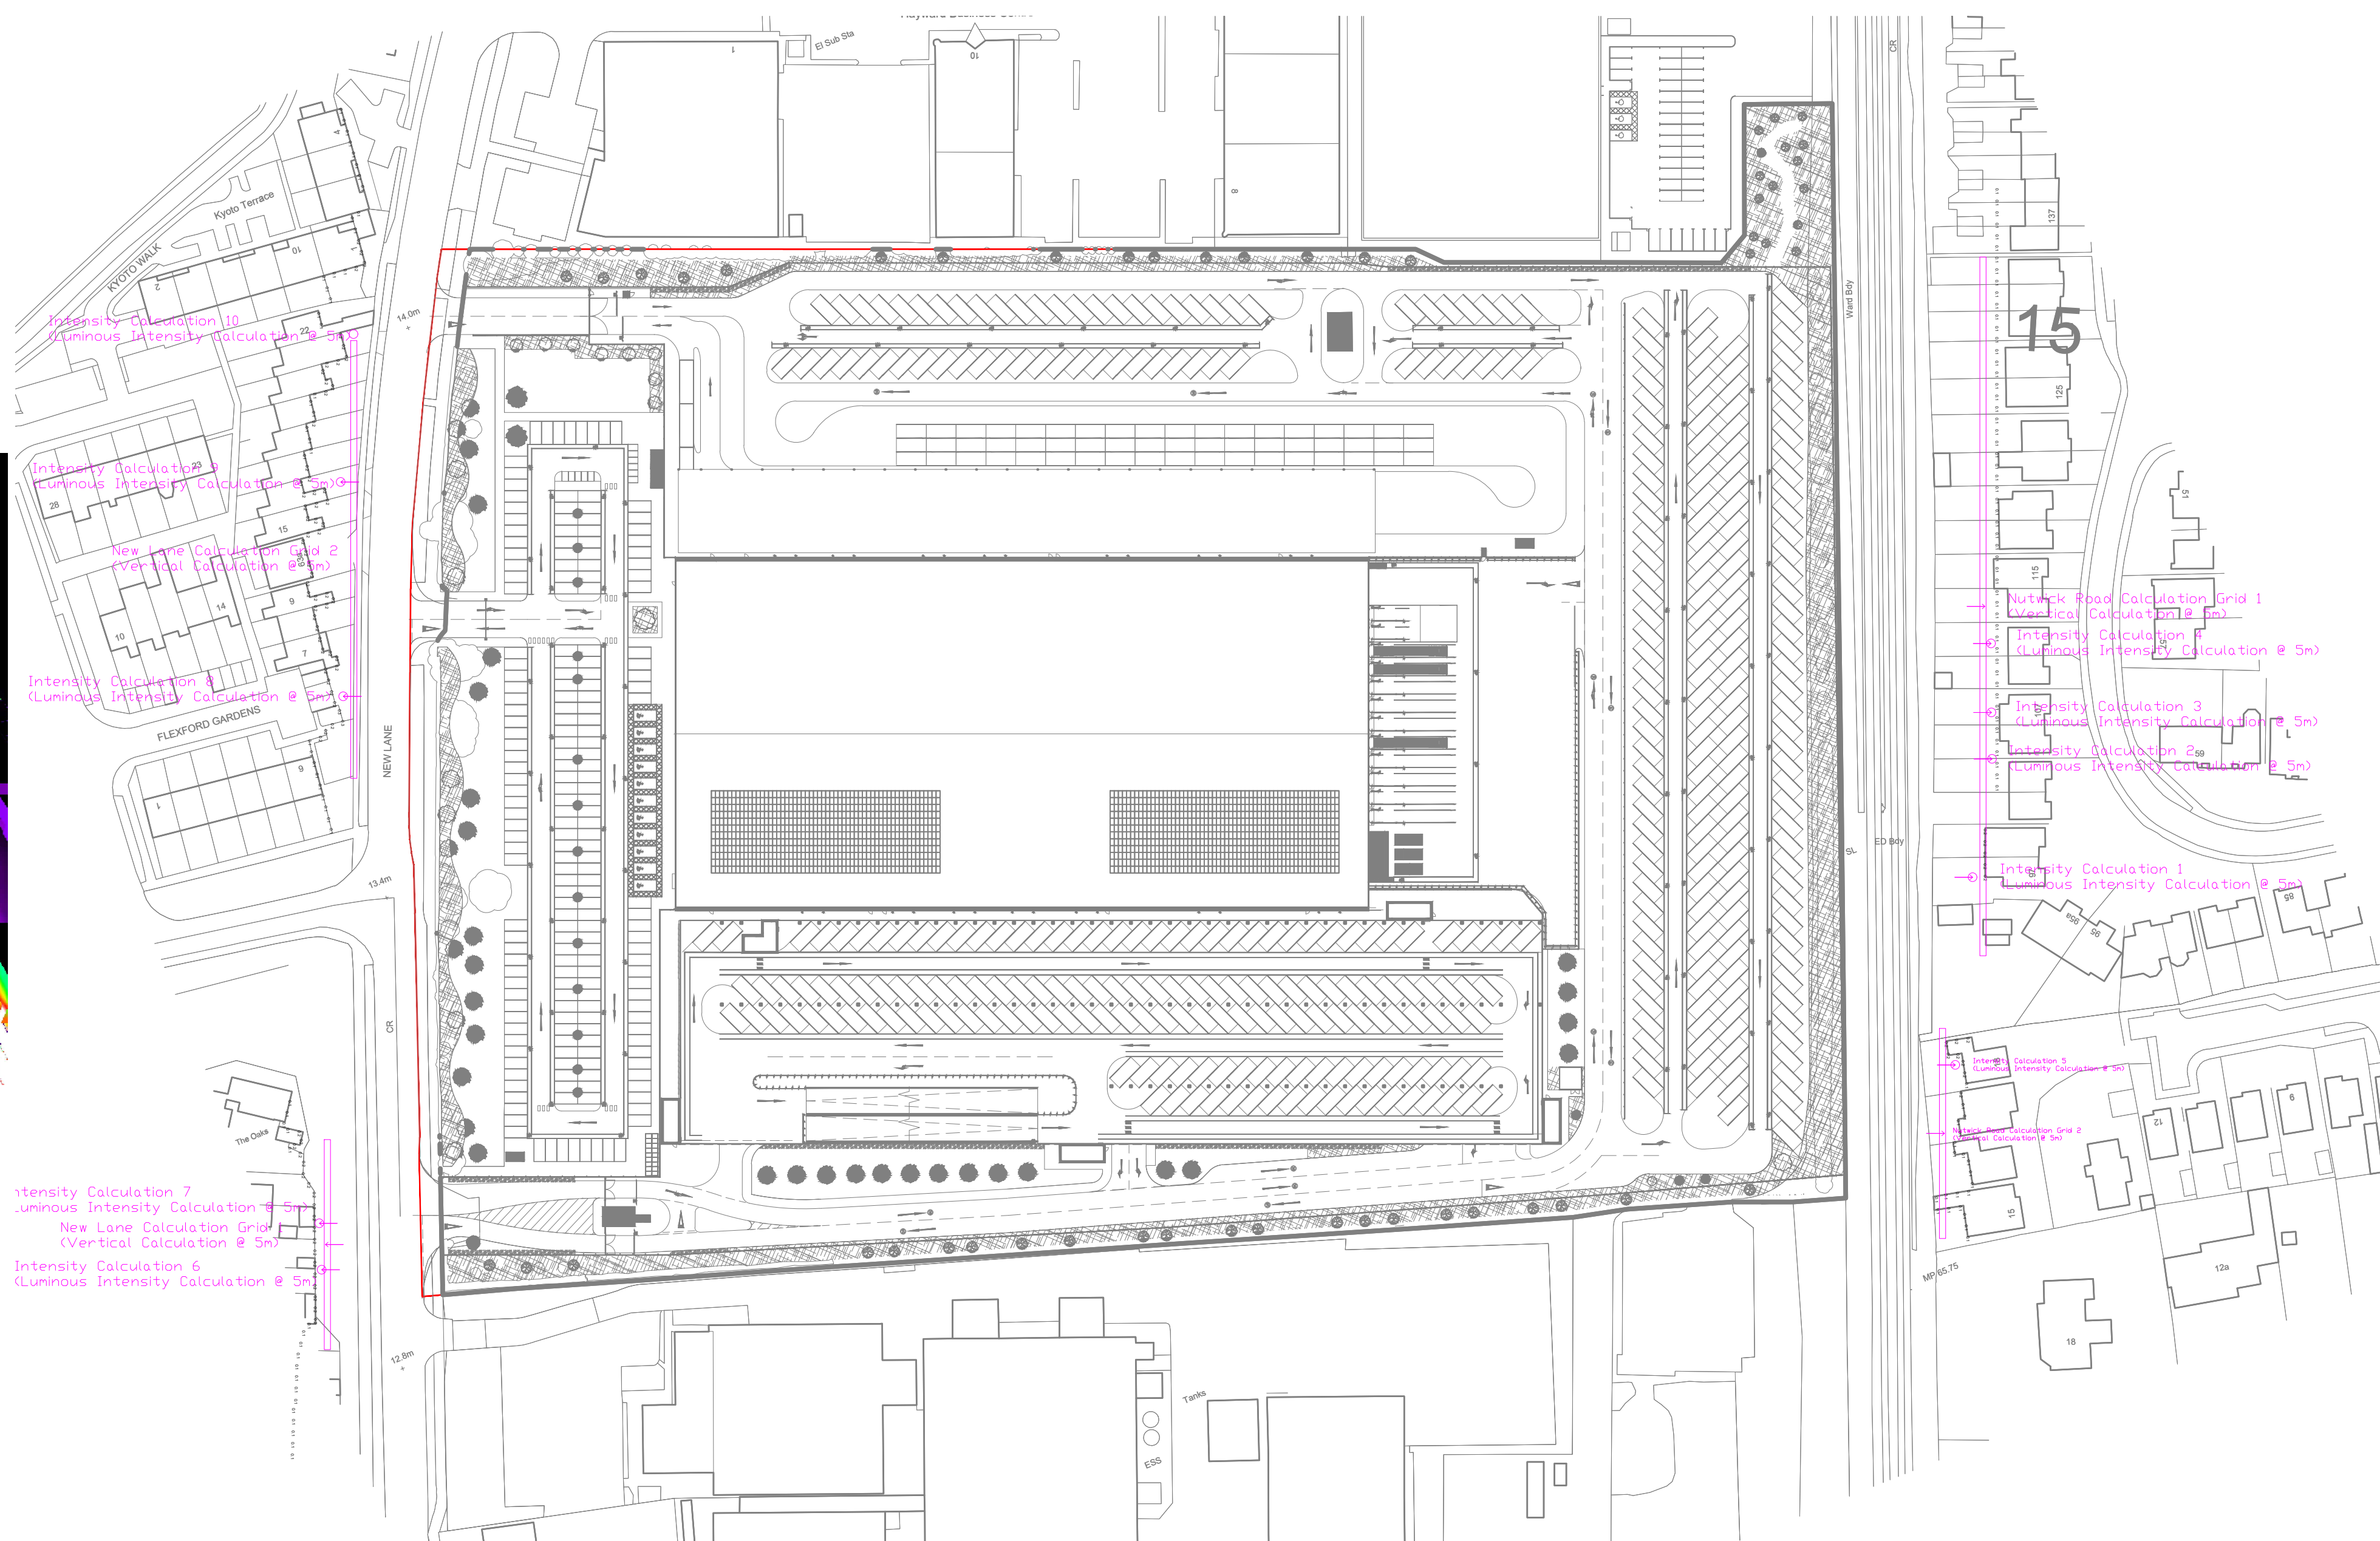

RENDER VIEW TOWARDS THE WAREHOUSE, LEVEL PARKING & MSVP (NTS)

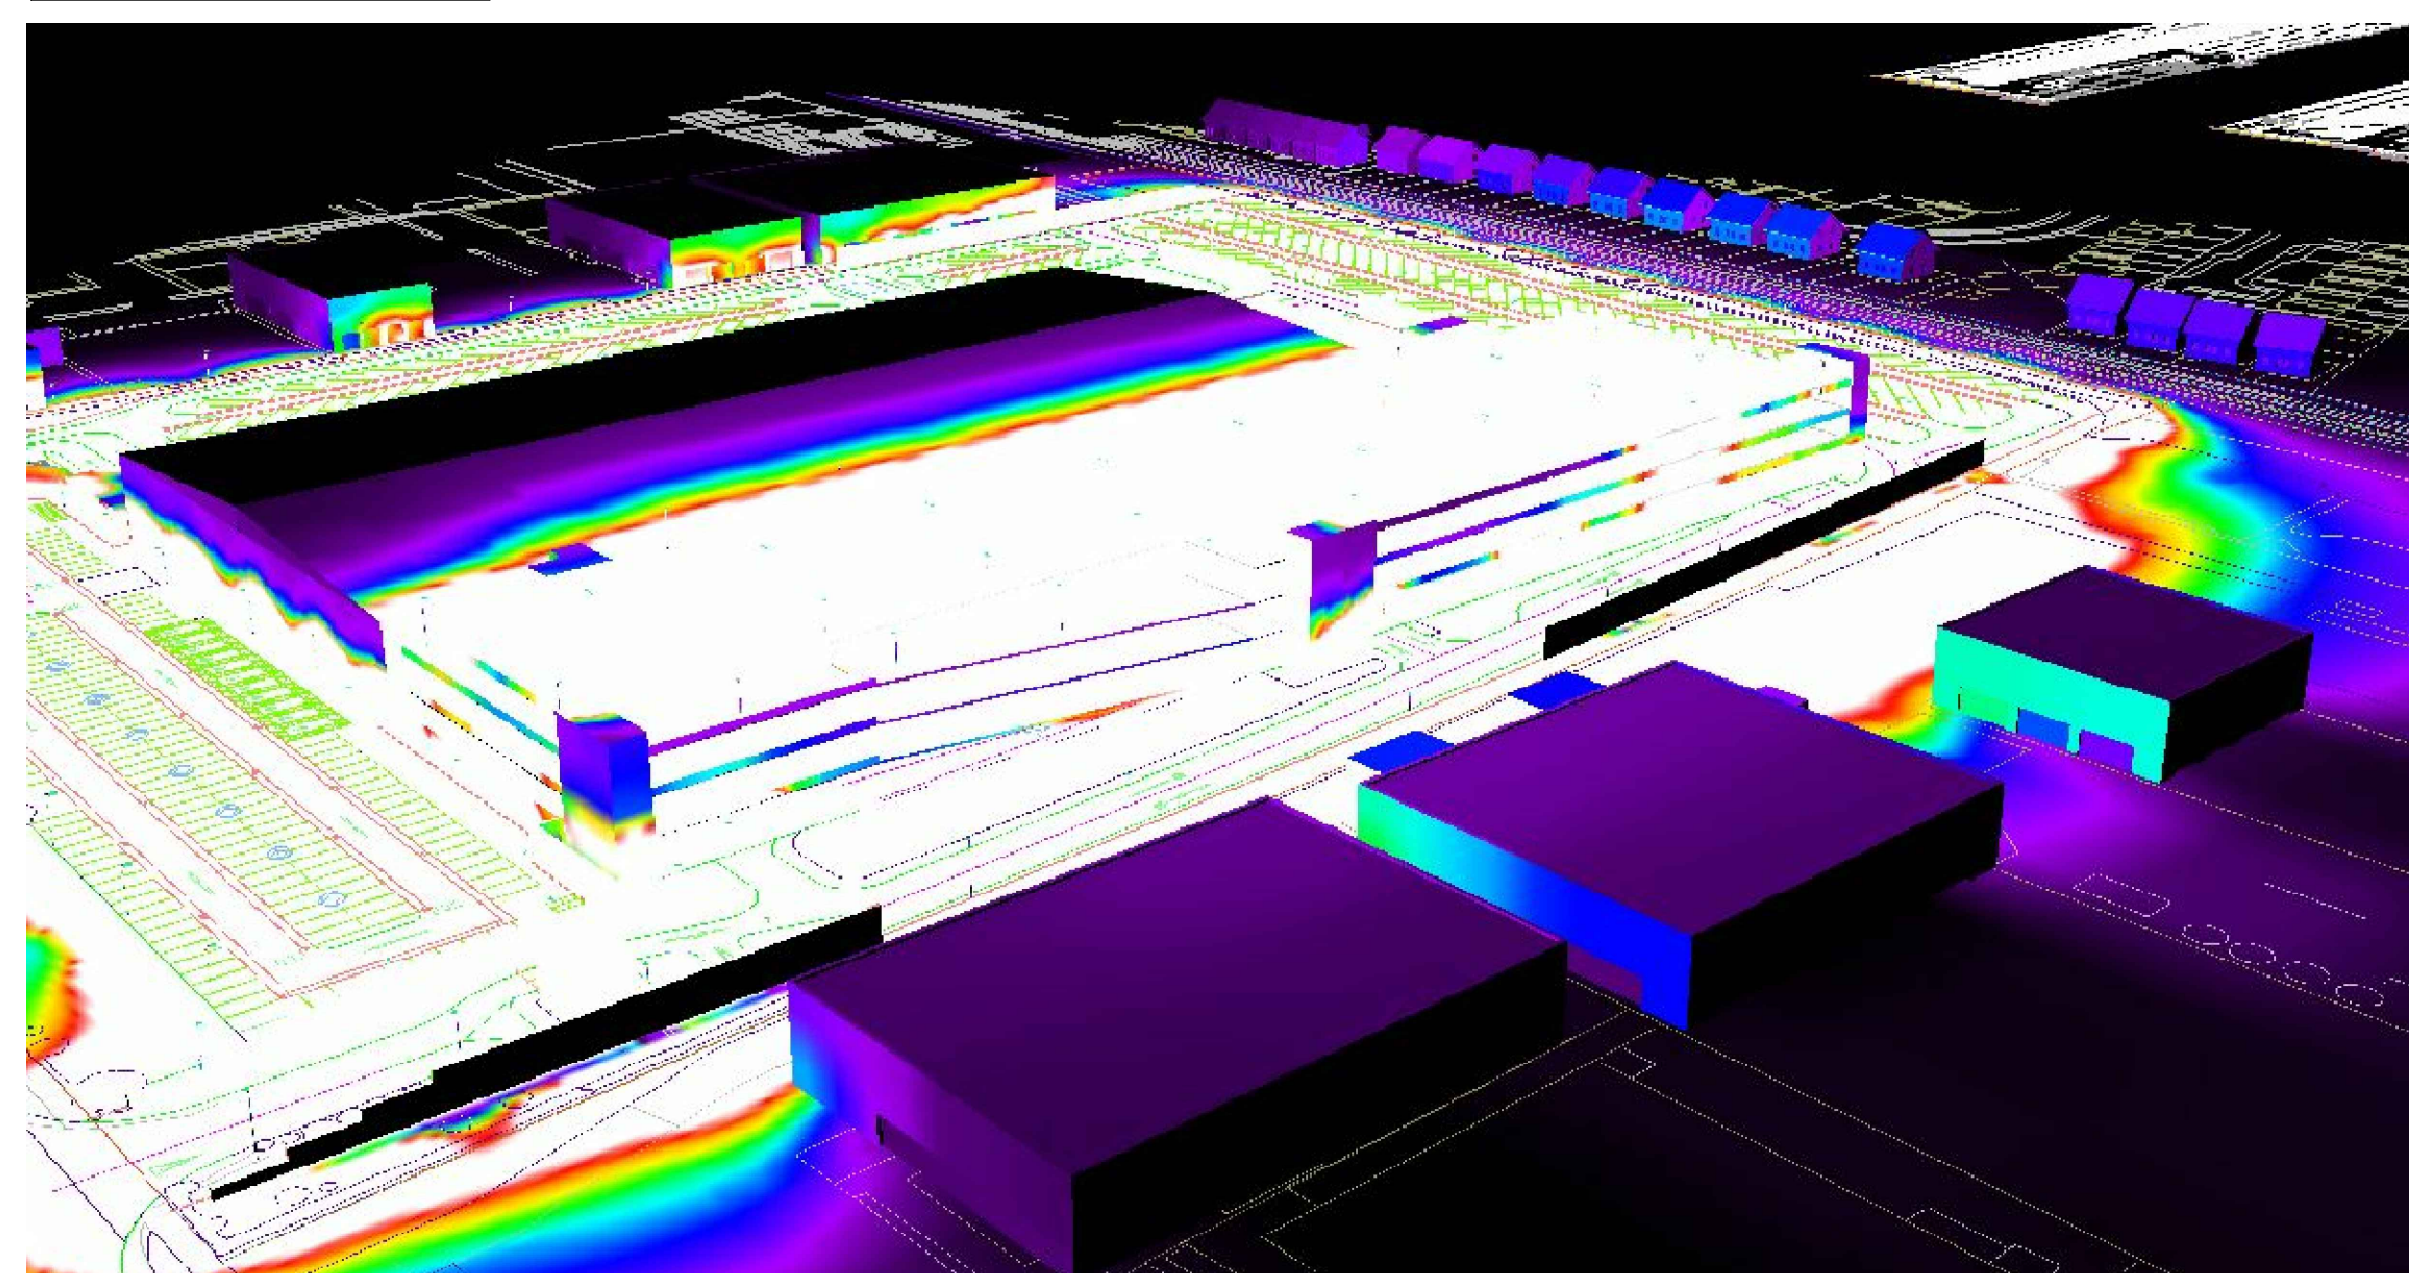

False colours set to 2lx (maximum intrusive light on properties in an E3 zone). Spill light contained via baffles on car park luminaires and facing all car parking luminaires away from residential areas. Spill light reduced by not using maximum power luminaires at entrances

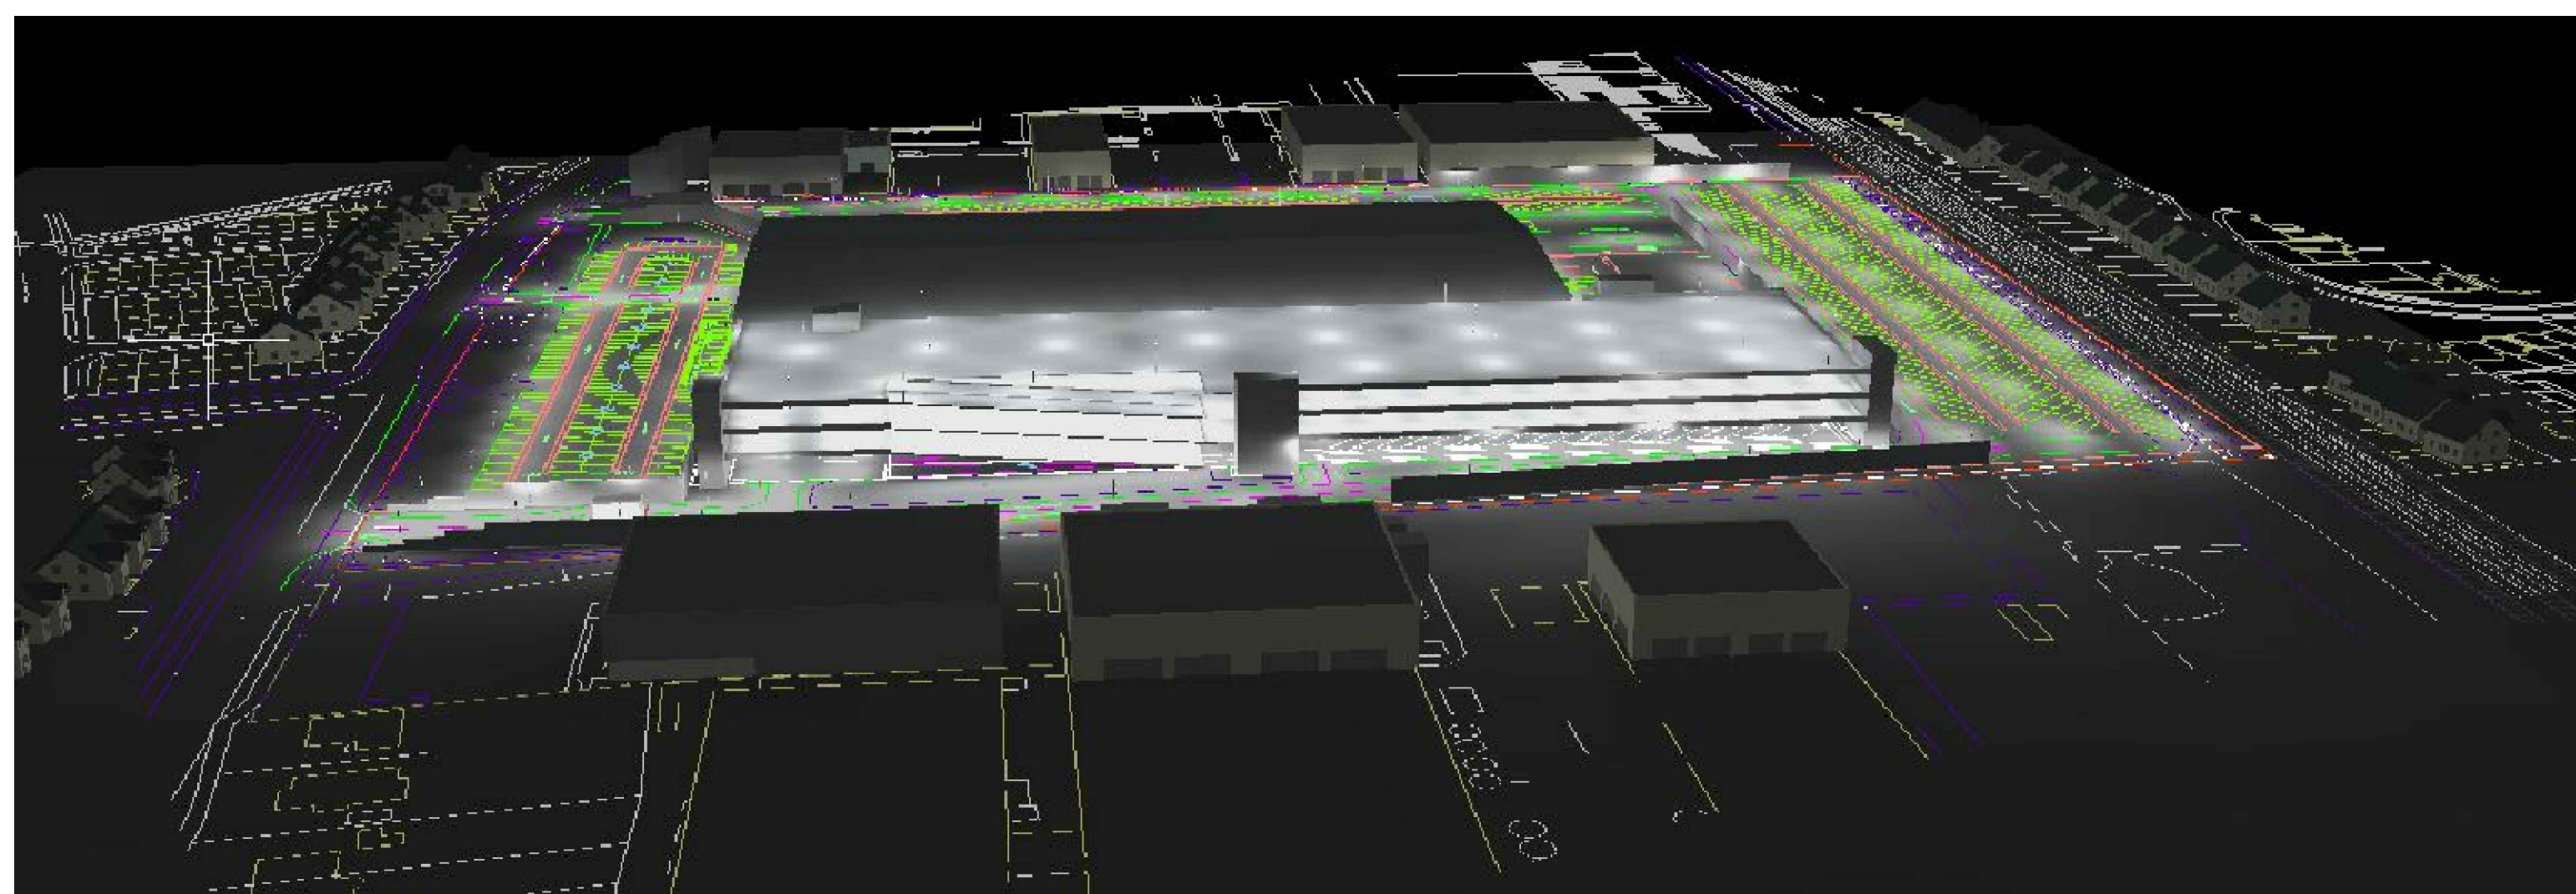

RENDER VIEW FROM ABOVE THE WAREHOUSE TOWARD EAST

False colours set to 2lx (maximum intrusive light on properties in an E3 zone). Spill light contained via baffles and facing all van parking luminaires away from residential areas.

RENDER VIEW FROM SOUTH-WEST TOWARDS THE WAREHOUSE & MSVP (NTS)

RENDER VIEW TOWARDS MSVP LONG ELEVATION (NTS)
