

West Proposed

This architectural elevation drawing shows a house with a gabled roof. A dormer window with a small gable is centered on the roof. To the left, there is a three-pane window above a large glass door. A small square window is located on the lower left wall. To the right, there is a small square window above a door. The drawing uses simple lines and shading to represent the building's form and features.

West Existing

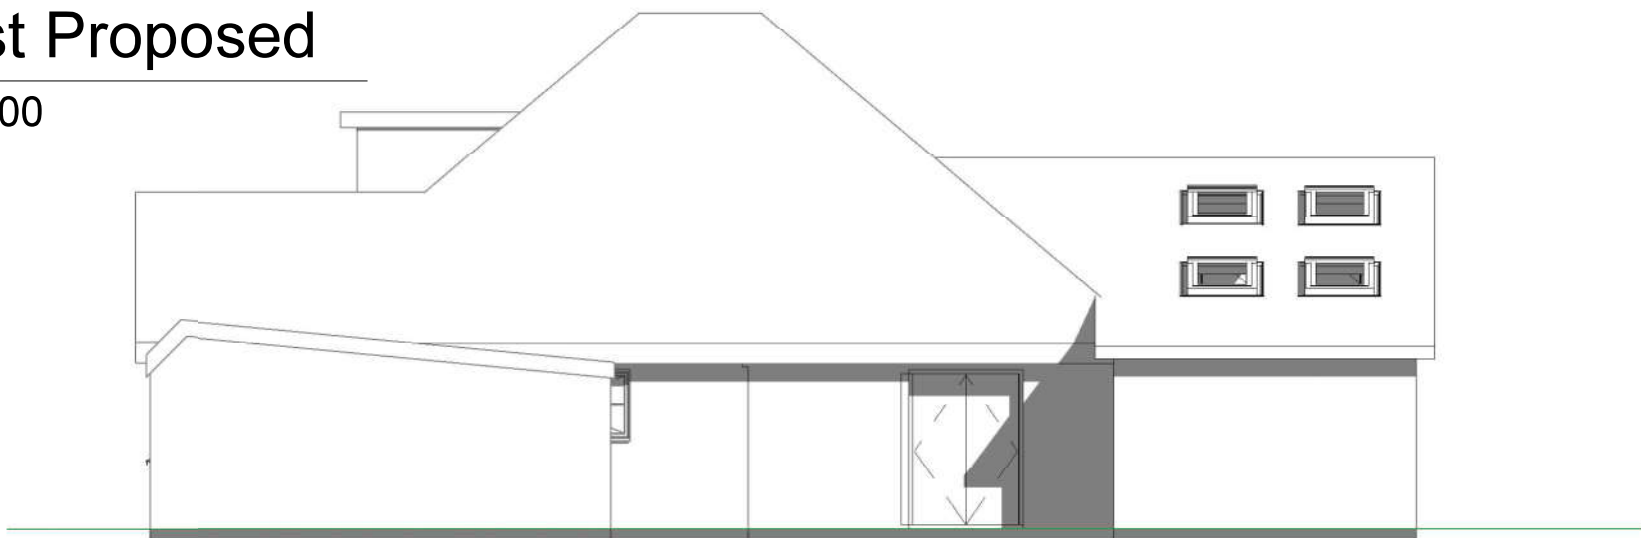

ing

This is a black and white architectural elevation drawing of a house. The house features a gabled roof with a chimney on the left side. A dormer window is centered on the roof. The main floor has a central entrance with a double door and a small window above it. There are also windows on either side of the entrance. The drawing uses simple lines and shading to represent the building's form and features.

East Existing

1 : 100

This architectural elevation drawing shows the east side of an existing building. The structure features a prominent gabled roof with a chimney on the right side. A smaller, lower section is visible on the left. The main facade has a dark horizontal band, possibly a base or a decorative element, with a window unit consisting of two panes. A vertical structural element, likely a column or support, is shown on the right. The drawing is a line art representation with some grey shading for the base and the vertical support.
