

Mr Toole, Please find detailed additional comments to the amended Planning Application detailed in the Subject for retrospective cladding & render to 25 Charlesworth Drive. I have no issue with the cladding & render addition to the plans although it has already been installed, and hence has made a mockery of the Planning Application which clearly states that no work has been undertaken. My new concern (not excluding all previous comments to this and all other Planning Applications) is what other work has / or will be undertaken that has not been included (or forgotten) in the Plans? The render & cladding was installed long before this recent and other applications being submitted. Hence, my Neighbours and I do not trust the developer, and believe that if this Planning Application is approved then further un-approved alterations will be made during the implementation of the Plans. Therefore, please ensure that all objections to this and previous Planning Applications are considered very seriously by yourself, and the Planning Committee and result in it being rejected again. PS. I still feel very annoyed about the Window at the Front Aspect on the First Floor as this has a major impact to my privacy which I find un-acceptable.
