

Homewell House, Havant, Hampshire, PO9 1EE

Design, Access and Heritage Statement

It is proposed to replace the existing single glazed timber casement windows which are significantly degraded, and replace with hardwood timber frames in matching style.

The new hardwood timber frames will incorporate slimline double glazing units with a white spacer bar. Using a slimline unit, with a white spacer bar, will appear as a single glazed unit and preserve the appearance of the existing unit while increasing thermal performance.

Access to the dwelling will remain as existing and the approach will remain unchanged. The external appearance will remain unaltered.
