Chichester Harbour AONB Unit : Delegated Process Assessment

8 Bath Road, Emsworth, Hampshire
Planning Application: **APP/21/00055**
Proposed erection of front doorway porch

Chichester Harbour AONB Unit Recommendation – No objection

Suggested considerations: -

- schedule of materials to be as indicated on submitted application forms / to match main house

Planning Approach

The statutory purpose of the AONB is to conserve and enhance the area's natural beauty. The LPA should assess the application carefully as to whether the proposed development would have a significant impact on or harm that statutory purpose. Relevant to this is the duty on public bodies to 'have regard' for that statutory purpose in carrying out their functions (Section 85 of the Countryside and Rights of Way Act, 2000). The Planning Practice Guidance confirms that this duty also applies to proposals outside the designated area but impacting on its natural beauty.

Chichester Harbour Conservancy, administer and safeguard the Chichester Harbour Area of Outstanding Natural Beauty (AONB). The aim of conserving and enhancing the areas natural beauty requires the Conservancy to consider the proposal on its landscape character aspects. Landscape covers both urban environments as well as countryside and coastal areas.

- Landscape Character

The Landscape Character Areas define relevant key characteristics, ecological features, important views across land and water areas, historical features, settlement character, as well as key issues to landscape condition and landscape sensitivity, together with a landscape strategy to be followed. The summary and recommendations lay out the special qualities of Chichester Harbour AONB protected landscape.

- Management Plan

The Chichester Harbour AONB Management Plan (2019-2024 Third Review April 2019) identifies 10 special qualities (page 10) that represent the exceptional features that contribute to the AONB designation. On this basis the Chichester Harbour Management Plan provides an integrated coastal zone management strategy for the Trust Port and Area of Outstanding Natural Beauty. Relevant policies would include Policy 1 (Conserving and Enhancing the landscape), Policy 2 (Development Management), and Policy 3 (Diversity of Habitats).

- Planning Principles

The Chichester Harbour Area of Outstanding Beauty Planning Principles (Management Plan version April 2019) provides guidance on development. These principles set a range of criteria to be addressed to achieve a favourable consideration in terms of likely impact within the AONB.

AONB Planning Principles **PP01: Chichester Harbour as a Protected Area**, is applicable to this and all proposals within or affecting the AONB protected landscape. This sets out the key over-arching

approach for the AONB, in that the statutory primary purpose is to conserve and enhance the natural beauty of the area. Great weight shall be given to the protection of the landscape, the conservation of nature, and the special qualities of Chichester Harbour and its surrounding supporting hinterland.

AONB Planning Principle **PP03: Replacement Dwellings and Domestic Householder Extensions**, guidance states that the acceptability of development will be dependent on whether the site can accommodate the proposal while still respecting local character by reflecting the surrounding pattern of development and spaces between buildings (the grain). Acceptability will also depend on the setting of the site within the landscape, and the design, materials and finishes employed. The size and scale of any extensions to the original dwelling are required to fall within guideline criteria relating to footprint increase (50% upper limit) and the increase from the original building silhouette profile 25% upper limit). These requirements are also stipulated under section-12 of the adopted Chichester Harbour AONB Joint SPD (2017).

AONB Planning Principle **PP09: Dark Skies**, lighting proposals that are adjacent to or impact on areas of nature conservation will only be supported in exceptional circumstances.

- Joint Chichester Harbour AONB SPD

The Chichester Harbour Area of Outstanding Beauty Joint Supplementary Planning Document (2017) requires that any development proposed in the AONB should be guided by to protect, conserve, and enhance natural beauty and wildlife (Section 2 overarching principles). Section 8 requires that in designing new development, consideration of the setting of the development in the AONB landscape must be shown as to how the proposal would contribute to the character of the area. All development within the AONB should follow the guidance as closely as possible. The SPD is adopted by both Chichester District Council and by Havant Borough Council as part of their planning policy and development control approach. The adopted guidance requires a clear demonstration that no harm is caused to the AONB.

Planning History Relevant to current proposal

APP/12/01138 – Proposal for ground floor rear extension to replace existing and rear dormer to second floor. No comments sought from or made by CHC. On 21 December 2012 the LPA approved the application.

Contextual Consideration - Site Location and Existing Development

The site is located within the Chichester Harbour Area of Outstanding Natural Beauty (AONB), where development is subject to more stringent planning guidance to ensure that development respects and enhances the inherent qualities of such a sensitive location.

The red-line application site indicates the residential planning unit.

The red-line site lies within a built-up settlement location (Emsworth town).

The site is not believed to lie within a LPA designated Conservation Area.

The site is not indicated to be on or close to a building on the scheduled list of buildings of historic or architectural importance.

The site is assumed as being within Flood Zone 1: Low Probability of flooding.

The site is located along the west side of Bath Road, opposite Slipper Mill Pond. The property is a mid-terrace two-storey house. The building is oriented east-west with the public front garden approach to the east.

Submitted Proposal and Supporting Documents

The current proposal seeks the addition of a front doorway fully enclosed glazed porch. The submission includes a Design and Access Statement which has been considered as part of the assessment.

Applicants Approach to the AONB protected landscape designation

The submission makes no reference to the sites location within the context and setting of the Area of Outstanding Natural Beauty protected national landscape. There is no reference made to the Chichester Harbour AONB planning policy documents relevant to the consideration of the proposal. The proposal has therefore apparently been made with minimal knowledge or acknowledgement of the status of the AONB and AONB Management Plan, or with a level of understanding that would be considered necessary and appropriate given the nationally recognised protected status of the AONB.

Planning Assessment

The statutory purpose of the AONB is to conserve and enhance the area's natural beauty. The adopted guidance requires a clear demonstration that no harm is caused to the AONB.

The consideration would require a full and detailed assessment of the potential, possible, and probable impact to the character and appearance of the site and locality of the AONB protected landscape. The main AONB protected landscape Planning Principle policy assessment issues to be considered for this site relate to –

1. Relevant planning history implications for the proposal
2. The principle of the use and activity of the development to the AONB locality
3. The positioning layout design and visual character and impact of the site to the AONB
4. The proposed physical works, scale, massing, and bulk on the AONB landscape
5. The building design, character, appearance, and finished treatment to the AONB
6. The impact on the tranquillity and natural environment to the AONB
7. The wildlife, biodiversity, and environmental effects within the AONB
8. Any measures to mitigate the impact of ecological and environmental disturbance
9. Consideration against the relevant AONB Planning Principle guidance

Consideration 1: The planning history implications for the proposal are not specifically relevant in this submission.

Consideration 2: The principle of the proposed use and activity would not likely be a significant concern due to the use relating to the proposal being unchanged as part of the associated residential use within the existing planning unit.

Consideration 3: The principle of the positioning, layout design and visual character and impact of the site to the AONB would require detailed examination if to be considered within the surrounding environment.

The proposal for the front doorway porch slightly extends the dwelling to the east side into the public front garden approach. There is no significant erosion of the public viewed amenity space or building separation to adjoining buildings that would alter the spatial dynamics of the immediate location. The layout on the site does not impair the character or overall setting of the area. The impact would be noticeable to the building, but only in terms of the immediate setting. This would be a limited alteration with minimal impact on the character of the property within the AONB protected national landscape.

Consideration 4: The principle of the proposed physical works and building bulk and scale would require detailed examination if to be considered within the surrounding environment.

The scale of the extension would be largely hidden from external public views. The scale of the proposal considered against **PP03** indicate that the extension would increase the original (pre the rear extension) ground footprint by approx. 9%. However, taking into account the existing rear extension, this increase to the current floor plan would be approx. 7%. This is within the guidelines. The front-rear building silhouette would lie within the existing building envelope, the side building silhouette would be increased by approx. 3%. The silhouette assessment falls within the guidelines set out.

The scale, massing, bulk, must also be assessed alongside the impact in building design and character.

Consideration 5: The principle of the building design and character, together with the appearance of the construction materials and finished treatment to the site and surrounds would not be a serious concern due to the design reflecting / being compatible with that of the host building.

The extension is subservient to and proportional to the host building. The appearance of the proposed works are considered to be generally in keeping with the visual character of the building and the setting of the immediate area. The works would not have a substantive impact on the wider AONB protected national landscape.

Consideration 6: The principle of the impact on the tranquillity and natural environment of the proposal would be unlikely to be a concern due to no anticipated change from the existing use and activity associated with the site.

The extension includes glazed doors and enclosing porch frame. The room provided would have daily use by the occupiers but only as a transitional route. The artificial light dispersed from the glazing would therefore impact on the surrounds but only for temporary periods. Measures to provide internal blind screening to the glazing should not be necessary, but if adopted in the bespoke design solution for this part of the proposal that would be welcomed.

Consideration 7: The principle of any harm to wildlife, biodiversity, and environmental character within the AONB is unlikely given the proposal relates to the occupation of the existing dwelling. The proposal would increase useable floor space at the site but would not increase the number of residential units or significantly increase occupation potential of the premises on the site. This should not result in any substantial increase in the demands for recreational activity in the locality or add to the associated disturbance of wildlife areas.

The proposal would not involve the removal of any substantial parts of the existing structure that could play host to existing wildlife habitation. The proposal therefore would not obviously impact on existing wildlife habitats. The change in the building profile would be unlikely to harm wildlife habitats / foraging routes. Assuming that there is no wildlife uses of the structure, the proposal would not therefore be viewed as harmful to the wildlife or biodiversity of the site.

Consideration 8: The principle of measures to mitigate the impact of ecological and environmental disturbance should not be necessary. Improvements could be considered generally through the installation of bird and bat boxes at the site, hedgehog houses in the rear garden, and similar easy applied wildlife improvements.

Consideration 9: The relevant AONB Planning Principle guidance is PP01, PP03, and PP09. The extension can be provided without harm to the local character of the surroundings or pattern of development and the spaces between buildings. The sites setting within the landscape and the design, materials and finishes employed are all acceptable. The guidance requirements are addressed in the proposed development. The proposal would be unlikely to have an alternative use outside the domestic associated activity of the site.

Summary Conclusion

The adopted guidance requires a clear demonstration that no harm is caused to the AONB. The sites location within open countryside within the AONB is a key consideration.

The positioning of the proposal would have a localised impact on the character and appearance of the site and the immediate surrounds. The structures scale, design and appearance with suitable construction materials would enable the building to sit unobtrusively within its setting. The proposal would have a limited visual impact on the AONB protected national landscape character.

The proposal is unlikely to have any significant impact or effect on the AONB in relation to wildlife conservation and protection.

Other Comment

The planning application will be considered by the LPA in terms of other aspects applicable to the planning merits of the proposal, such as any overlooking impact to neighbouring property and gardens, any perceived loss of privacy, any equated loss of light and cause of shadowing, noise generation and disturbance, traffic generation and on-site parking provision, and in terms of overall good building design and land-use neighbourliness.

A copy of this planning assessment report is attached to the consultation comment response to the LPA for information and for open transparency public view.
