Dear Daphney,

RE: APP/15/01425 – 8 New Lane, Havant

We have recently received an email communication from PLC Architects following communication with yourself regarding the final discharge of contamination conditions at the above site.

We understand that Havant Borough Council require clarification of the following points:

- Confirmation of the location of any boreholes retained for monitoring purposes
- Confirmation that any retained boreholes are fully secure
- If no boreholes were retained then confirmation that all boreholes have been decommissioned.

Omnia can confirm than no boreholes on the site were retained for future monitoring purposes.

We have received written confirmation from the developer, REL Winchester (Attachment 1) stating that *"all boreholes were removed, filled with clean materials and capped off and that no boreholes were retained for further testing."*

In view of the above points, we trust that the attached statement will be sufficient to satisfy the requirements to allow discharge.

If you have any further queries please do not hesitate to contact the undersigned.

Yours sincerely,

A blue ink signature of Dr Adrian King.
