

The Havant Health Profile, (<https://fingertips.phe.org.uk/static-reports/health-profiles/2019/E07000090.html?area-name=Havant>) identifies significant health inequalities within the borough, including levels of obesity and physical inactivity within adults and children, that are above regional averages.

The potential leisure infrastructure and physical activity opportunities associated to the proposed reservoir and its surroundings, including walking and cycling networks, visitor centre, play provision and watersport potential, provides a significant opportunity to positively impact on the health profile.

We look forward to seeing further detail emerge with regards to both land and water serving leisure facilities and the opportunity to consult on the detailed design of such, in relation to local need.

The detailed design of the play area and open spaces elements should consider the Havant Open Space Strategy, as below. <https://www.havant.gov.uk/sites/default/files/documents/Havant%20Borough%20Open%20Space%20Strategy%20%28November%202018%29.pdf>).

Many thanks
Simon
