Re: 9 Western Parade Emsworth PO10 7HS

We enclose a planning application for consideration of the granting of retrospective approval for fencing at the above as letter dated 14.10.20 from Katie Howard.

Please note since measurements were taken with Katie Howard, Ms Prentice has raised the level of the sunken flower beds in front of the fence to the surrounding grass area and each post height was measured on 6.11.20 53 no. the highest of which was 1.50m and the lowest 0.98m making an av of 1.266 as opposed to 1.20 on the drawings. The soul planting bed may however compact to a lower level again.

In addition, the pr 5 bar gates are 1.15 high with the only addition height being the 1.66 Meram curved single strut at the edge of the gates.

The fence is approx. 11m in length of which approx. 4.35 is covered externally by an aged fusia bush up to 2.55m high.

Also since the meeting with Katie Howard, Ms Prentice has gone to considerable expense and planted hedging outside the fence which is circa 50-60cm higher than the fence as enclosed photographs.

There is considerable local and walker support for the fence in its present form and Ms Pentice has a considerable number of signatures in support which the winter dissuaded her from continuing with.

Yours sincerely

Maurice Hiscock
